Abstracts

The global organic dyes market size reached US\$ 3.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 5.4 Billion by 2028, exhibiting a growth rate (CAGR) of 5.57% during 2022-2028.

Organic dyes, also known as natural dyes, are made using complex aromatic compounds with substantial structural diversity. They provide a high degree of biological, chemical, and photocatalytic stability, which is resistant to degradation. As a result, they are utilized in processes like agricultural research and electroplating, and the production of a wide range of products, such as fabric, leather, textile, pulp and paper, cosmetics, and pharmaceuticals. Some of the commonly available organic dyes include acid, vat, reactive, and mordant.

Organic Dyes Market Trends:

A significant increase in the demand for eco-friendly products due to the rising awareness among individuals about environmental concerns represents one of the key factors bolstering the growth of the market. Apart from this, there is a considerable increase in awareness among parents about the harmful impact of artificial dyes on babies, which may lead to vomiting, cyanosis, and abdominal distension. This, coupled with the rising utilization of organic dyes in the construction industry across the globe for masonry, walls, floor tiles, and roof tiles, is contributing to market growth. Furthermore, the introduction of numerous advancements in the printing industry is offering lucrative growth opportunities to market players operating in the industry. This, in confluence with the introduction of new textile colors and innovative designs in textiles, is positively influencing the sales of organic dyes. Besides this, manufacturers are continuously funding research and development (R&D) activities to develop robust and cost-effective technologies for the processing and widening application of organic dyes around the

world. They are also focusing on improving the quality of the existing product, which is projected to impel the growth of the market further.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global organic dyes market report, along with forecasts at the global, regional and country levels from 2023-2028. Our report has categorized the market based on product, source and application.

Breakup by Product:

- Acid
- Basic
- Reactive
- Direct
- Disperse
- Sulphur
- Others

Breakup by Source:

- Animal
- Plant
- Minerals

Breakup by Application:

- Paints and Coatings
- Textiles
- Plastics
- Printing Inks
- Others

Breakup by Region:

- North America
- United States
- Canada
- Asia-Pacific

China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
