## **Abstracts**

The global oriented strand board (OSB) market size reached 35.0 Million Cubic Meters in 2023. Looking forward, IMARC Group expects the market to reach 48.9 Million Cubic Meters by 2032, exhibiting a growth rate (CAGR) of 3.7% during 2024-2032.

Oriented strand board (OSB) refers to a type of stiff, structural, strong, and versatile engineered wood-based panel product. It is manufactured using waterproof heat-cured adhesives and rectangularly shaped wood strands that are arranged in cross-oriented layers. It is widely used for floor underlayment, wall sheathing, roof cover, staircase, trailer liners, subflooring and recreational vehicles. OSB is manufactured in various grades with improved moisture resistance, versatility, toughness, cost-effectiveness, and good dimensional stability. It also resists shape distortion, racking, deflection and delamination due to which it is widely used in flooring, construction, furniture and packaging applications.

Oriented Strand Board (OSB) Market Trends:

Significant growth in the construction industry across the globe is creating a positive outlook for the market. OSB is widely used in residential and non-residential buildings in a wide range of applications, such as solid walls, squeak-free floors and roof sheathing. In line with this, the widespread product utilization in the construction of doors, floors and roofs, columns, staircases and beams is favoring the market growth. Moreover, various technological advancements, such as the introduction of lightweight, customized and waterproof OSB that assists in water absorption and prevents moisture build-up,

are providing an impetus to the market growth. Additionally, the increasing number of green building constructions and the rising demand for eco-friendly and sustainable building resources, such as OSB, is positively impacting the market growth. An overall increase in the environmental consciousness, coupled with an enhanced focus toward sustainable development is acting as another major growth-inducing factor. Other than this, the extensive utilization of the board for packaging various items, such as food and beverages, pharmaceuticals, and cosmetics, due to its humidity resistance, durability and long-lasting properties, are anticipated to drive the market toward growth.
