Abstracts

The global osteotomy plates market size reached US\$ 600.7 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 933.8 Million by 2032, exhibiting a growth rate (CAGR) of 4.9% during 2024-2032.

Osteotomy is a medical procedure involving the cutting of a bone to shorten or lengthen it or realign with another bone. It includes knee, hip, jaw, and chin osteotomy to fix a defect that affects the growth of an individual. It is used to improve various deformities of bones and joints while delaying the progression of painful conditions, such as arthritis, and relieving pain. It is also utilized for treating painful bunions caused by the outward displacement of the first toe, which can be rectified by restoring its shape. At present, there is a rise in the prevalence of bone-related diseases among the masses, which is catalyzing the demand for osteotomy plates across the globe.

Osteotomy Plates Market Trends:

The growing adoption of surgical procedures for safer diagnosis and treatment of various diseases represents one of the key factors driving the market. Moreover, there is an increase in the number of road accidents due to overspeeding, drunk driving, distractions on the road, and avoiding safety gear, such as seat belts and helmets. This, along with the rising prevalence of osteoporosis among individuals on account of the loss of tissue or deficiency of calcium or vitamin D, is propelling the growth of the market. In addition, governments of several countries are extensively investing in healthcare infrastructure, which is positively influencing the market. Besides this, there

is a rise in the number of people who have musculoskeletal disorders, such as Blount's disease and knee osteoarthritis, around the world. This, coupled with the increasing sports-related injuries due to poor training methods, structural abnormalities, and weakness in muscles, tendons, and ligaments, is offering lucrative growth opportunities to industry investors. Additionally, the rising utilization of osteotomy plates to realign the knee of a patient is bolstering the growth of the market.
