Abstracts

The global patch cable market size reached US\$ 2.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 4.6 Billion by 2028, exhibiting a growth rate (CAGR) of 7.53% during 2023-2028.

Patch cable, also known as patch cord, is used to connect a power supply to an end device for signal routing. It carries telephonic, audio, and video signals between non-networked devices, such as headphones and microphones. It is shorter than other conventional networking cables and widely available in numerous colors. At present, a surge in need for data transfer and networking in all commercial activities is catalyzing the demand for patch cables across the globe.

Patch Cable Market Trends:

The rising demand for a high-speed network in production facilities to evaluate real-time data, improve production processes and offer smooth as well as secure transmission of data represents one of the key factors driving the market. Moreover, enhancement in cable technologies and usage of patch cables in transmitting power over ethernet (PoE) is propelling the growth of the market. In addition, there is an increase in the development of data centers to store, manage, and disseminate a huge amount of data. This, along with the emergence of the 5G network, is positively influencing the market. It relies on patch cables to connect equipment within the domain of radio access network (RAN) and back to the core and routing network infrastructure. Besides this, the increasing utilization of patch cables in residential and institutional spaces on account of their low latency and noise interference, easy installation, and reliability is contributing to the growth of the market. Apart from this, the growing penetration of fiber to the x (FTTx) is offering lucrative growth opportunities to the key players. Furthermore, technological advancements in healthcare, telecommunication, and administrative

sectors are stimulating the growth of the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global patch cable market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product type, cable type, application and end use.

Breakup by Product Type:

Copper Cable
Fiber Optics

Breakup by Cable Type:

CAT 3
CAT 5
CAT 5E
CAT 6
CAT 6A
CAT 7
Multimode Optical Fiber
Others

Breakup by Application:

Networking
Non-Networking

Breakup by End Use:

Industrial
Enterprise
IT and Network Security
Others

Breakup by Region:

North America

United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being AGC Networks Limited, CommScope Inc., Corning Incorporated, CP Technologies, Legrand, NAI Group LLC, Panduit, Prysmian Group, Quabbin Wire & Cable Co. Inc. and Schneider Electric SE.

Key Questions Answered in This Report:

How has the global patch cable market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global patch cable market?

What are the key regional markets?

What is the breakup of the market based on the product type?

What is the breakup of the market based on the cable type?

What is the breakup of the market based on the application?

What is the breakup of the market based on the end use?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global patch cable market and who are the key players?

What is the degree of competition in the industry?
