## **Abstracts**

The global peptide therapeutics market size reached US\$ 39.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 66.1 Billion by 2028, exhibiting a growth rate (CAGR) of 9.10% during 2022-2028.

Peptides are efficacious and selective signaling molecules that bind to specific cell surface receptors, such as ion channels and G protein-coupled receptors (GPCRs) and trigger intracellular effects. They are employed in the pharmaceutical industry to design novel regenerative therapeutics that can target a wide range of cells and manipulate their responses. These therapeutics are less toxic, relatively safe, and well-tolerated than other treatment options. As a result, they are gaining traction in clinical practices worldwide to manage cancer, injuries, infectious diseases, metabolic disorders, and aesthetic concerns.

Peptide Therapeutics Market Trends:

The growing prevalence of acute and chronic diseases, along with the rising access to medical facilities, represents one of the leading factors positively influencing the

demand for peptides to develop innovative therapies. Moreover, peptide therapies are used in cosmetic surgeries to slow down the process of skin aging. This, coupled with the increasing consciousness among individuals about physical appearance and the desire to retain young and healthy skin, is driving the adoption of cosmetic surgeries and peptide therapeutics around the world. Apart from this, with the introduction of novel synthetic strategies that reduce injection frequency and improve stability and other physical properties, peptide therapeutics are widely being used in injections for diabetic patients. This, in confluence with the increasing incidence of diabetes and the growing preference for quick and precise treatment methods, is influencing the use of peptide therapeutics over oral medications. Furthermore, the emerging trend of personalized and targeted treatments is catalyzing the demand for multifunctional peptide-based materials. This, along with the rising funding to develop novel peptide therapeutics for treating autoimmune and inflammatory diseases, is projected to create a positive market outlook.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global peptide therapeutics market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on type, type of manufacturer, synthesis technology, routes of administration and application.

#### Breakup by Type:

- Innovative
- Generic

#### Breakup by Type of Manufacturer:

- Outsourced
- In-house

#### Breakup by Synthesis Technology:

- Solid Phase Peptide Synthesis
- Liquid Phase Peptide Synthesis
- Hybrid Technology

#### Breakup by Routes of Administration:

Parenteral  
Oral  
Others

Breakup by Application:

Gastrointestinal Disorders  
Neurological Disorders  
Metabolic Disorders  
Cancer  
Others

Breakup by Region:

North America  
United States  
Canada  
Asia-Pacific  
China  
Japan  
India  
South Korea  
Australia  
Indonesia  
Others  
Europe  
Germany  
France  
United Kingdom  
Italy  
Spain  
Russia  
Others  
Latin America  
Brazil  
Mexico  
Others  
Middle East and Africa

### Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Amgen Inc., Apitope International NV, Arch Biopartners Inc., AstraZeneca plc, Circle Pharma Inc., Corden Pharma GmbH, F. Hoffmann-La Roche AG, Ipsen Group, Lonza Group AG, Novo Nordisk A/S, Pfizer Inc., Teva Pharmaceuticals Industries Ltd. and Zealand Pharma A/S.

### Key Questions Answered in This Report

1. How big is the global peptide therapeutics market?
2. What is the expected growth rate of the global peptide therapeutics market during 2023-2028?
3. What are the key factors driving the global peptide therapeutics market?
4. What has been the impact of COVID-19 on the global peptide therapeutics market?
5. What is the breakup of the global peptide therapeutics market based on the type?
6. What is the breakup of the global peptide therapeutics market based on the type of manufacturer?
7. What is the breakup of the global peptide therapeutics market based on the synthesis technology?
8. What is the breakup of the global peptide therapeutics market based on the routes of administration?
9. What is the breakup of the global peptide therapeutics market based on the application?
10. What are the key regions in the global peptide therapeutics market?
11. Who are the key players/companies in the global peptide therapeutics market?
