## Abstracts

The global pet insurance market reached a value of US\$ 6.2 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 12.6 Billion by 2027, exhibiting a CAGR of 12.5% during 2022-2027. Keeping in mind the uncertainties of COVID-19, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic. These insights are included in the report as a major market contributor.

Pet insurance is a health care policy that provides reimbursement against veterinary bills and treatment expenditures. It provides partial or complete coverage against veterinary procedures. Pet owners purchase the insurance policy to cover treatment costs of injuries, death due to illnesses, accidents, poisoning, hospitalization and surgeries. It involves the payment of monthly premiums based on the species, breed, age and existing illnesses of the pet. It assists the owners in choosing treatments at the best medical institutions for their ailing and injured pets. Pet insurance also aids in providing access to premium healthcare services, veterinary professionals and minimizing the overall costs of pet healthcare.

### Pet Insurance Market Trends:

The increasing consumer preference for pet adoption and humanization across the globe is one of the key factors driving the growth of the market. Moreover, the rising awareness among pet owners regarding insurance policies that cover treatment costs of accidental injuries and medical conditions, such as urinary tract infection (UTI), burns, broken bones and X-rays, is favoring the market growth. Additionally, the increasing prevalence of cancer among dogs is also impacting the requirement of pet insurance. Various breeds of dogs, such as Labrador retrievers, boxers, Bernese Mountain, German shepherds and rottweilers, have a higher tendency for developing cancer at a

young age and require extensive medical attention and care. Moreover, various technological advancements, such as the development of activity monitors for tracking exercise levels, rest and weight of the pets, are providing a thrust to the market growth. In line with this, the launch of multi-pet insurance policies that cover multiple pets in a single plan is also contributing to the growth of the market. Other factors, including the implementation of various government initiatives regarding strict pet insurance regulations, along with the increasing demand for veterinary healthcare facilities, are anticipated to drive the market toward growth.
