Market Outlook 2023-2028:

The global phenol market size reached US\$ 22.0 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 30.0 Billion by 2028, exhibiting a growth rate (CAGR) of 5.19% during 2023-2028. The growing demand for various cleaning and sanitizing products, increasing utilization as bio preservatives, and rising incorporation in paints, adhesives, and coatings represent some of the key factors driving the market.

Rising Demand for Phenol in Various End-Use Industries Augmenting Market Growth

The diversified industrial applications of phenol due to its versatile nature and affordable pricing is propelling the growth of the market. The economic reform resulting in the increasing disposable incomes and changing lifestyle patterns of individuals across the globe has significantly catalyzed the demand for phenol in various end-use industries. The rising construction of various residential apartments and roads, and highways around the world is propelling the demand for phenol. Phenol is also utilized as a solvent and cleaning agent in households and various commercial setups to prevent the spread of diseases. It is employed as a cleaner for various electronic devices and industrial machinery, as it possesses enhanced penetrating power into organic matter. Moreover, the increasing demand for phenol in the manufacturing of various personal care products to maintain hygiene and prevent the formation of mouth and body odors is impelling the growth of the market. Phenol is also used as an essential raw material in the plastic industry to manufacture plastics and various explosives, such as picric acid, which is an essential component for making matchsticks and electric batteries. The growing utilization of phenol as a raw material in the manufacturing of drugs and

antioxidants is offering a favorable market outlook. Furthermore, the increasing adoption of phenol as a primary component in wood preservatives, such as creosote, is bolstering the growth of the market.

Competitive analysis such as market structure, market share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. The market structure is fragmented, with several small and large players operating in the industry. The volume of new entrants is moderate in the phenol industry due to the presence of high capital investments, the requirement of manufacturers to gain economies of scale, and easy access to distribution networks. Furthermore, the market is characterized by low product differentiation rates and switching costs.

What is Phenol?

Phenol is an aromatic compound that occurs in a white crystalline form at room temperature. It comprises strong hydrogen bonds, which makes it more soluble in water than alcohol and possesses higher boiling points as compared to other hydrocarbons with similar molecular weight. It is mildly acidic and caustic in nature and occurs either as a colorless liquid or white solid. It darkens slowly on exposure to light and possesses a characteristically sweet odor. Phenol was initially manufactured through a synthetic process involving the sulfonation and chlorination of benzene. It is currently manufactured from benzene and propylene by converting them into cumene, then oxidizing it into cumene hydroperoxide, and hydrolyzing it to form phenol. It is commercially available as n-hexylresorcinol, which is often incorporated in cough drops and syrups, and other antiseptic applications. It also consists of butylated hydroxytoluene (BHT), which is non-toxic and a common antioxidant in various food products. It is incorporated into mouthwashes and household cleaners to restrict the growth of various disease-causing microorganisms. It is often utilized as a slimicide which is a broad-spectrum antimicrobial pesticide used to kill slime-producing microorganisms, such as algae, bacteria, and fungi. Phenol is employed in the manufacturing of a wide variety of arts and crafts supplies, body paints, glitters, and other play cosmetics. It is also employed in the pharmaceutical industry as a preservative in vaccines to retain their efficiency. It is also utilized in manufacturing oral analgesics, throat and nasal sprays, and surgeries for ingrown toenails. It is utilized as a gentle preservative for a wide variety of personal care products, such as soaps, deodorants, antiperspirants, shampoos, toothpaste, and toners. It is also injected into muscles to prevent the occurrence of muscle spasticity, which hampers the ability to walk. Furthermore, as it is easily available, cost-effective,

and can be purchased in bulk quantities, the demand for phenol is increasing across the globe.

Phenol Market Trends:

At present, the rising demand for various cleaning and sanitizing products due to growing health consciousness among the masses represents one of the primary factors influencing the market positively. Besides this, the increasing utilization of phenolic resins for producing thermosetting plastics is propelling the growth of the market. Additionally, there is a reduction in the price of raw materials required for the manufacturing of phenol around the world. This, coupled with the limited availability of substitutes for phenol, is contributing to the growth of the market. Apart from this, the growing demand for phenol in the manufacturing of various skincare products, such as chemical peels to remove dead skin cells and smoothen the skin texture, is offering a favorable market outlook. In addition, the increasing utilization of phenolic compounds as bio preservatives for enhancing the antioxidant and antimicrobial capacity of fresh fruits and vegetables is supporting the growth of the market. Moreover, the rising incorporation of phenol in paints, adhesives, and coatings is impelling the growth of the market. Furthermore, the increasing demand for preservatives in the food and beverage (F&B) industry to retain the taste and quality of various consumable and perishable products is bolstering the growth of the market.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global phenol market report, along with forecasts at the global and regional level from 2023-2028. Our report has categorized the market based on end-use.

End-Use Insights:

- Bisphenol A
- Phenolic Resins
- Caprolactam
- Alkyl Phenyls
- Others

The report has provided a detailed breakup and analysis of the phenol market based on the end-use. This includes bisphenol A, phenolic resins, caprolactam, alkyl phenyls, and others. According to the report, bisphenol A represented the largest segment as it finds

vast applications in the production of epoxy resins and polycarbonates which are used for manufacturing plastic lenses in eyewear, protective gears, cover for greenhouses, and exterior lighting fixtures. Besides this, the rising utilization of bisphenol A in the manufacturing of food and beverage containers, electronic equipment, medical devices, household appliances, telephones, and automotive parts is propelling the growth of the respective segment.

Regional Insights:

Asia Pacific

Europe

North America

Middle East and Africa

Latin America

The report has also provided a comprehensive analysis of all the major regional markets, which include Asia Pacific, Europe, North America, the Middle East and Africa, and Latin America. According to the report, Asia Pacific was the largest market for phenol. Some of the factors driving the Asia Pacific phenol market included the growing investment in the chemical industry, rising installation of advanced machinery to boost the production rate, and increasing demand for various personal care products to maintain self-hygiene and prevent body odors. In addition, the increasing construction of various residential and commercial buildings, coupled with the rising demand for renovation and remodeling of public infrastructures is catalyzing the demand for phenol across the region.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global phenol market. Some of the companies covered in the report include:

Ineos Phenol

Cepsa Quimica Sa

Mitsui Chemicals

Formosa Chemicals and Fibers

Kumho P & B Chemicals

Please note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

What was the global phenol market size in 2022?

What will be the global phenol market outlook during the forecast period 2023-2028?

What are the key industry trends of the global phenol market?

What is the impact of COVID-19 on the global phenol market?

What is the global phenol market breakup by end-use?

What are the major regions in the global phenol market?

Who are the leading phenol manufacturers?

Contents

1 PREFACE

2 SCOPE AND METHODOLOGY

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
 - 2.3.1 Primary Sources
 - 2.3.2 Secondary Sources
- 2.4 Market Estimation
 - 2.4.1 Bottom-Up Approach
 - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology

3 EXECUTIVE SUMMARY

4 INTRODUCTION

- 4.1 Overview
- 4.2 Physical and Chemical Properties
- 4.3 Key Industry Trends

5 GLOBAL PHENOL INDUSTRY

- 5.1 Market Overview
- 5.2 Market Performance
 - 5.2.1 Volume Trends
 - 5.2.2 Value Trends
- 5.3 Price Analysis
 - 5.3.1 Key Price Indicators
 - 5.3.2 Price Structure
 - 5.3.3 Price Trends
- 5.4 Market Breakup by Region
- 5.5 Market Breakup by End-Use
- 5.6 Market Forecast
- 5.7 SWOT Analysis
 - 5.7.1 Overview

- 5.7.2 Strengths
- 5.7.3 Weaknesses
- 5.7.4 Opportunities
- 5.7.5 Threats
- 5.8 Value Chain Analysis
 - 5.8.1 Raw Material Procurement
 - 5.8.2 Manufacturing
 - 5.8.3 Distribution
 - 5.8.4 Exports
 - 5.8.5 End-Use
- 5.9 Porter's Five Forces Analysis
 - 5.9.1 Overview
 - 5.9.2 Bargaining Power of Buyers
 - 5.9.3 Bargaining Power of Suppliers
 - 5.9.4 Degree of Competition
 - 5.9.5 Threat of New Entrants
 - 5.9.6 Threat of Substitutes
- 5.10 Trade Data
 - 5.10.1 Imports
 - 5.10.2 Exports
- 5.11 Key Market Drivers and Success Factors

6 PERFORMANCE OF KEY REGIONS

- 6.1 Asia Pacific
 - 6.1.1 Market Trends
 - 6.1.2 Market Forecast
- 6.2 Europe
 - 6.2.1 Market Trends
 - 6.2.2 Market Forecast
- 6.3 North America
 - 6.3.1 Market Trends
 - 6.3.2 Market Forecast
- 6.4 Middle East and Africa
 - 6.4.1 Market Trends
 - 6.4.2 Market Forecast
- 6.5 Latin America
 - 6.5.1 Market Trends
 - 6.5.2 Market Forecast

7 MARKET BY END-USE

7.1 Bisphenol A

7.1.1 Market Trends

7.1.2 Market Forecast

7.2 Phenolic Resins

7.2.1 Market Trends

7.2.2 Market Forecast

7.3 Caprolactam

7.3.1 Market Trends

7.3.2 Market Forecast

7.4 Alkyl Phenyls

7.4.1 Market Trends

7.4.2 Market Forecast

7.5 Others

7.5.1 Market Trends

7.5.2 Market Forecast

8 COMPETITIVE LANDSCAPE

8.1 Market Structure

8.2 Production Capacities of Key Players

8.3 Profiles of Key Players

8.3.1 INEOS Phenol

8.3.2 Cepsa Quimica Sa

8.3.3 Mitsui Chemicals

8.3.4 Formosa Chemicals and Fiber

8.3.5 Kumho P & B Chemicals

9 PHENOL MANUFACTURING PROCESS

9.1 Product Overview

9.2 Chemical Reactions Involved

9.3 Manufacturing Process

9.4 Detailed Process Flow

9.5 Raw Material Requirement

9.6 Mass Balance and Feedstock Conversion Rates

10 PHENOL FEEDSTOCK MARKET ANALYSIS

10.1 Benzene

10.1.1 Market Performance

10.1.1.1 Volume Trends

10.1.1.2 Value Trends

10.1.2 Price Trends

10.1.3 Market Breakup by Region

10.1.4 Market Breakup by End-Use

10.1.5 Key Suppliers

10.2 Propylene

10.2.1 Market Performance

10.2.1.1 Volume Trends

10.2.1.2 Value Trends

10.2.2 Price Trends

10.2.3 Market Breakup by Region

10.2.4 Market Breakup by End-Use

10.2.5 Key Suppliers
