## Abstracts

The global pigeon pea market size reached 16.1 Million Tons in 2023. Looking forward, IMARC Group expects the market to reach 34.7 Million Tons by 2032, exhibiting a growth rate (CAGR) of 8.6% during 2024-2032.

Pigeon pea is a tropical plant of the pea family, which is commonly grown as a food crop. It has a deep tap-root structure that enables it to collect water and other nutrients from the secondary soil profile for thriving during dry seasons. It is a rich source of thiamin, riboflavin, niacin, vitamin B-6, folate, vitamin A, calcium, iron, magnesium, phosphorous, and potassium. It helps prevent and cure ailments like bronchitis, coughs, pneumonia, respiratory infections, pain, menstrual disorders, sores, wounds, abdominal tumors, diabetes, acidity, stomach pain, poisoning, piles, and swelling of internal organs. Besides this, as it is an ideal supplement for a protein-deficient diet, the consumption of pigeon pea is rising across the globe.

### Pigeon Pea Market Trends:

At present, pigeon pea finds extensive applications in animal feed, fuel wood, rearing lac insects, green manuring, soil conservation, and windbreaks. Besides this, it is employed in the food and beverage industry for preparing different soups, stews, curries, sauces, and rice dishes on account of its numerous health benefits. These health benefits include boosting energy, building immunity, preventing anaemia, treating inflammation, maintaining blood pressure, and strengthening the cardiovascular system and digestive systems. Moreover, pigeon pea is considered one of the most pivotal pulse crops for food and feed security in dry places due to its high drought resilience. Apart from this, the perennial nature of pigeon pea enables farmers to take multiple harvests and use the surplus for trade in both local and international markets. This, coupled with the rapidly growing population, low prices, expanding imports, rising per

capita income and the easy availability of high storage facilities worldwide, is projected to create a positive outlook for the market in the upcoming years.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global pigeon pea market report, along with forecasts at the global and regional level from 2024-2032.

#### Breakup by Region:

India  
Myanmar  
Malawi  
Kenya  
Tanzania

India currently holds the largest market share on account of the increasing production of pigeon pea in the country. This, coupled with the rising usage of its leaves in the treatment of diarrhea and dysentery and numerous initiatives undertaken by the Government of India for the welfare of farmers, is positively influencing the market.

#### Competitive Landscape:

The competitive landscape of the market has been analyzed in the report, along with the detailed profiles of the major players operating in the industry.
