Abstracts

The global pink himalayan salt market size reached US\$ 232.0 Million in 2023. Looking forward, IMARC Group expects the market to reach US\$ 286.8 Million by 2032, exhibiting a growth rate (CAGR) of 2.31% during 2024-2032.

Himalayan pink salt is a natural, pink-hued variant of salt that contains extra minerals and nutrients than regular salt. It is free from chemicals and enriches the body with magnesium, calcium, zinc, iron, and potassium, which help maintain electrolytes and boost immunity. It helps cleanse the respiratory system and provides relief from asthma, hay fever, sinus infections, and allergies. It aids in weight loss, helps solve digestive problems, and prevents gas accumulation by promoting acid-alkaline balance. Besides this, its moderate consumption improves serotonin levels and assists in reducing stress, promoting sound sleep, boosting energy, and relieving depression. As a result, pink Himalayan salt is extensively used in the food and beverage (F&B) industry for seasoning, cooking, and preserving foods.

Pink Himalayan Salt Market Trends:

The rising prevalence of chronic medical disorders, such as obesity, diabetes, asthma, and other respiratory diseases, represents one of the key factors positively influencing the market. In addition, the growing awareness among individuals about the health benefits of pink Himalayan salt over regular table salt is catalyzing its demand across

the globe. The escalating demand for salt with low sodium content and the shifting consumer preferences towards organic food are also contributing to market growth. Apart from this, the expansion of spas, along with the emerging trend of salt therapy, is driving the sales of pink Himalayan salt as it cures skin allergies and lifestyle diseases, which is stimulating the market growth. Furthermore, the proliferation of the e-commerce industry that provides doorstep delivery, exciting deals and discounts, online payment methods, and easy availability of products is offering lucrative growth opportunities to leading market players. Moreover, the increasing utilization of pink Himalayan salt for non-dietary purposes, such as formulating bath salts and salt lamps, is creating a positive market outlook.
