Abstracts

The global policy management software market size reached US\$ 1.5 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 3.1 Billion by 2028, exhibiting a growth rate (CAGR) of 11.9% during 2023-2028.

Policy management software refers to the technological solution used for creating, communicating and maintaining organizational policies and procedures. It enables the enterprises to centralize policies, optimize stakeholder involvement and transfer information efficiently. The software is commonly used for document review and approval, automated reminder notifications, electronic approval signatures and document versioning and revision tracking. It aids in enhancing the accessibility of the policies and protecting the enterprise from litigations and financial risks. The software can be deployed through the web or on the cloud that provides additional security for sensitive documents and data. As a result, it is widely used across various industries, such as banking, financial services and insurance (BFSI), information technology (IT), energy, healthcare, manufacturing and retail.

Policy Management Software Market Trends:

Significant growth in the healthcare industry across the globe is one of the key factors creating a positive outlook for the market. As the coronavirus disease (COVID-19) continues to spread, there has been a substantial increase in the demand for efficient information management solutions across the medical centers. Small, medium and large-scale enterprises are also widely adopting policy management software to monitor employee performance and record risk impact for policy exemption. It is also utilized for automating the management of new regulations and policies and enhancing the overall organizational efficiency. Additionally, the increasing implementation of machine-to-

machine communications is acting as another growth-inducing factor. Service providers are also integrating various value-added services with the software application programming interface (API) for document access controls and policy status reporting. Other factors, including extensive improvements in the IT infrastructure, along with the increasing adoption of subscriber data management solutions, are anticipated to drive the market toward growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global policy management software market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on component, deployment model, enterprise size and industry vertical.

Breakup by Component:

- Solution
- Services

Breakup by Deployment Model:

- On-premise
- Cloud-based

Breakup by Enterprise Size:

- Large Enterprises
- Small and Medium-sized Enterprises

Breakup by Industry Vertical:

- BFSI
- IT and Telecom
- Energy and Utilities
- Healthcare
- Government and Defense
- Manufacturing
- Retail
- Others

Breakup by Region:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Brazil

Mexico

Others

Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Alcatel-Lucent Enterprise International SAS (China Hoaxin Post and Telecom Technologies Co. Limited), Amdocs Inc., Cisco Systems Inc., Comarch SA, ConvergePoint Inc., Huawei Technologies Co. Ltd., Intracom S.A. Telecom Solutions, Juniper Networks Inc., Nokia Corporation, Optiva Inc., Oracle Corporation and Telefonaktiebolaget LM Ericsson.

Key Questions Answered in This Report

1. What was the size of the global policy management software market in 2022?
2. What is the expected growth rate of the global policy management software market during 2023-2028?

3. What are the key factors driving the global policy management software market?
4. What has been the impact of COVID-19 on the global policy management software market?
5. What is the breakup of the global policy management software market based on the component?
6. What is the breakup of the global refrigerant market based on the deployment model?
7. What is the breakup of the global policy management software market based on the enterprise size?
8. What are the key regions in the global policy management software market?
9. Who are the key players/companies in the global policy management software market?
