## Abstracts

The global polydextrose market size reached US\$ 287.6 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 394.9 Million by 2028, exhibiting a growth rate (CAGR) of 5.1% during 2023-2028.

Polydextrose is a non-digestible carbohydrate and soluble fiber that is used as a texturizer and low-calorie bulking agent to increase the fiber content of different food products. It is obtained by melting and condensing glucose polymers with sorbitol end groups and comprises D-glucose, sorbitol, citric acid, and phosphoric acid. It is commonly utilized as an alternative to starch, sugar, and fat in food items like ice cream. As polydextrose offers numerous health benefits, such as lowering blood glucose and cholesterol levels and increasing the frequency of bowel movements and mineral absorption in the intestinal tract, its demand is growing around the world.

### Polydextrose Market Trends:

The rising prevalence of chronic diseases, such as diabetes and obesity, is positively influencing the demand for functional food products on account of their high fiber and low-calorie content. This, in turn, is strengthening the growth of the polydextrose market across the globe. Besides this, the rising health consciousness among individuals, along with the escalating demand for nutritional and dietary supplements, is also creating a positive outlook for the market. Furthermore, polydextrose finds extensive application in bakery and confectionery products, beverages, sauces, dessert mixes, gelatin, salad dressings, candies, and breakfast cereals. It is also employed as a stabilizer, humectant, and thickener in yogurts and other products. Moreover, the widespread adoption of polydextrose in commercial beverages and medical foods due to its low-carb, rich fiber content and low glycemic index are driving the sales further.

### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global polydextrose market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on form and application.
