## **Abstracts**

The global practice management systems market size reached US\$ 17.1 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 33.7 Billion by 2032, exhibiting a growth rate (CAGR) of 7.65% during 2024-2032.

A practice management system (PMS) refers to software that handles the daily operations of healthcare organizations. It efficiently manages healthcare data, patient scheduling, medical billing tasks, and referral policies. It also lowers the administrative burden, thereby allowing healthcare professionals to focus on quality care. With the paradigm shift in healthcare systems, PMS assists in processing patient data through computer software and systems like Software-as-a-Service (SaaS). The continual influx of patient data following the diagnosis of the disease is carefully stored and maintained in the long run. Moreover, the integration of electronic medical records (EMR) with PMS is facilitating an inclusive data management system. Recently, PMS has gained traction as this system increases the efficiency of current medical practices and institutions, saves time and resources, and provides high returns on investment.

Practice Management Systems Market Trends:

The global practice management system market is primarily driven by the various advantages offered by PMS. It helps lower operational costs and reduces the overall cost of healthcare. It also condenses healthcare delivery costs by promoting evidence-

based patient care and health plans, improving management strategies, and consolidating the system. Moreover, PMS focuses on reducing administration errors by combining lucrative reimbursement policies. Besides this, the growing demand for patient-centric care approach and the availability of cloud-based PMS, especially in emerging economies, is also contributing to the market growth. Other factors, including the development of mobile apps that offer PMS solutions, the growing demand for automation and intelligent software solutions, increasing investments for upgrading healthcare facilities across the globe, are expected to drive the market further in the coming years.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global practice management systems market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on component, product, deployment mode and end user.

#### Breakup by Component:

- Software
- Services

#### Breakup by Product:

- Integrated
- Standalone

#### Breakup by Deployment Mode:

- Web-based
- On-premises
- Cloud-based

#### Breakup by End User:

- Physician Back Office
- Pharmacies
- Diagnostic Laboratories
- Others

## Breakup by Region:
