## Abstracts

### Market Overview:

The global prepacked chromatography columns market size reached US\$ 1.9 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 2.9 Billion by 2028, exhibiting a growth rate (CAGR) of 8% during 2023-2028.

Prepacked chromatography columns refer to pre-filled columns used for the decontamination of specific chemical compounds from mixtures. They are commonly used for various chromatography procedures, such as ion exchange, hydrophobic stationary phase, multimodal, etc. They aid in managing the otherwise time-consuming and laborious process of packing the chromatography columns, thereby providing more time for processing the chemicals. They also eliminate the need to clean hardware and enable the users to test multiple chromatography resins for media evaluation at the same time. Owing to this, they find extensive applications in pharmaceutical, biotechnological, food and beverage and research applications.

Significant growth in the pharmaceutical industry, along with increasing product utilization in drug discovery and biological research, is one of the key factors creating a positive outlook for the market. Manufacturers are using prepackaged chromatography columns to produce vaccines and monoclonal antibodies that are cost-effective and can aid in treating rare and new diseases. Furthermore, widespread adoption of prepacked chromatography columns in the agriculture sector is also providing a boost to the market growth. They are used to analyze plant growth hormones and conduct pesticide residue analysis to ensure that the crops are free of contaminants. In the food and beverage industry, these columns are used to analyze volatile flavor components in

fresh and processed food products and conducting chemical studies of oxidative breakdown of fats and lipids by micro-organisms. Other factors, including the increasing demand for single-use products and extensive research and development (R&D) activities in biotechnology, are expected to drive the market further.
