## **Abstracts**

The global pressure vessel market size reached US\$ 22.3 Billion in 2021. Looking forward, IMARC Group expects the market to reach US\$ 29.1 Billion by 2027, exhibiting a growth rate (CAGR) of 4.57% during 2022-2027.

Pressure vessels are spherical or cylindrical containers used to store high-pressure gases or liquids. They comprise components, such as distributor trays, catalyst support grids, baffles, and de-mister pads. At present, the production of pressure vessels is inspected under the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code. These standards aid in eliminating redundant fabrication, reducing traceability and inspection, improving quality control, and minimizing the overall cost.

### **Pressure Vessel Market Trends:**

A considerable rise in the need for energy around the world on account of rapid urbanization and increasing reliance on smart devices represents one of the key factors strengthening the growth of the market. Pressure vessels are widely utilized as receivers wherein physical and chemical processes undertake at high temperatures and pressures. As a result, there is a significant rise in the employment of these vessels in the oil and gas industry across the globe. Moreover, pressure vessels are adopted in the chemical industry worldwide as they assist in combining, dividing, and removing directions of an existing product. They also offer benefits, such as resistance from cross-contamination and corrosion. Furthermore, leading players are introducing advanced pressure vessels, such as pressure boilers. This, in confluence with the growing usage of supercritical power generation technology, is creating a favorable market outlook. Besides this, the escalating demand for customized vessels is offering lucrative growth

opportunities to market players across the globe. Some of the other major factors, including the thriving chemical and petrochemical industry, the increasing requirement for cooling and heating equipment, and extensive investments in exploration and production activities by leading oil and gas companies, are anticipated to drive the market.
