Abstracts

The Qatar paper packaging products market size reached US\$ 386.5 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 593.2 Million by 2028, exhibiting a growth rate (CAGR) of 7.4% during 2022-2028.

Paper packaging products are manufactured by bleaching fibrous compounds obtained from wood and recycled wastepaper pulp. These products mainly comprise of corrugated boxes, paper bags and sacks, folding boxes and cases, liquid paperboard cartons, etc. Based on their easy recyclability and biodegradability, paper packaging products have gained traction as a sustainable alternative to plastic packaging materials. As a result, these products are widely adopted across diverse sectors, including retail, pharmaceutical, FMCG, hospitality, etc.

In Qatar, the growth of the paper packaging products market can be primarily attributed to the rising environmental consciousness towards reducing carbon footprints from conventional packaging materials. The Qatar government has introduced numerous green economy initiatives, under the National Vision 2030, for minimizing the depletion of non-renewable resources by controlling waste generation in the country. Additionally, the implementation of stringent regulations regarding the ban on single-use plastic is further catalyzing the need for green packaging materials, including paper packaging products. Apart from this, the growing penetration of e-commerce platforms in Qatar is also bolstering the demand for corrugated boxes, folding boxes and cases, inserts and dividers, etc. Furthermore, the rising demand for processed and ready-to-eat food products, along with the growing number of online food delivery services, is augmenting the market for food-grade paper packaging solutions. In addition to this, the increasing popularity of organic beauty products and personal grooming items is also driving the demand for paper packaging solutions to promote ecological sustainability. Additionally, several regional manufacturers of paper packaging materials are heavily investing in the

development of innovative product variants with enhanced durability, improved flexibility, better recyclability, etc. In the coming years, numerous advancements in paper recycling technology, along with the introduction of digital printing solutions, will continue to drive the market for paper packaging products in Qatar.
