Abstracts

The global ride-hailing service market size reached US\$ 161.8 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 283.5 Billion by 2028, exhibiting a growth rate (CAGR) of 9.2% during 2023-2028.

Ride-hailing refers to the process of booking customized rides online by customers via transportation network companies (TNCs). Ride-hailing services are convenient, cost-effective, safe for riders and help offer mobility to senior citizens as well as people with disabilities. They also display the license plate and model of the car to ensure that riders get into the right vehicle and can share the route with friends and family members.

Ride-Hailing Service Market Trends:

At present, there is a rise in the trend of on-demand transportation services due to flexible routing and ad-hoc scheduling of private automobiles. These automobiles allow passengers to have a personalized transportation experience by picking up and dropping off at their preferred locations. This, along with the growing number of employment opportunities offered by ride-hailing services, represents one of the key factors driving the market. Moreover, the rising employment of autonomous vehicles in ride-hailing services to reduce carbon dioxide (CO₂) emissions in the environment are propelling the growth of the market. In addition, there is an increase in the utilization of mobility-as-a-service (MaaS) among individuals to reduce traffic congestion, road injuries, and the overall discomfort associated with traveling. This, coupled with the expanding user base of ride-hailing services around the world due to easy booking of vehicles and hassle-free payments as compared to conventional taxi services, is offering lucrative growth opportunities to key players. Besides this, several ride-hailing companies are raising funds from investors to enhance their technology and deliver

better services to their clients. In line with this, governments of several countries are providing subsidies to drivers for encouraging them to take more bookings, which is bolstering the market growth.
