## **Abstracts**

The global security information and event management (SIEM) market size was valued at USD 6.36 Billion in 2024. Looking forward, IMARC Group estimates the market to reach USD 15.05 Billion by 2033, exhibiting a CAGR of 9.54% during 2025-2033. North America currently dominates the market, holding a significant market share of over 33.2% in 2024. The market is influenced by rising cyber threats, regulatory compliance mandates, and increasing cloud adoption. Organizations require real-time threat detection, log management, and advanced analytics to combat ransomware, insider threats, and APTs. AI-driven security automation, threat intelligence, and hybrid IT security solutions, accelerating the security information and event management (SIEM) market share.

Security information and event management (SIEM) refers to the process of aggregating, storing, and analyzing several events that are generated through the technological infrastructure of organizations. It is commonly utilized for log management and reporting, threat intelligence, security analytics, behavior profiling, and database management. Event discovery and correlation enhance the speed of network event monitoring by consolidating error logs and alerts into a unified solution. As a result, SIEM is widely employed across numerous industries, such as BFSI, IT and telecom, healthcare, retail, energy and utilities, etc.

Security Information and Event Management (SIEM) Market Trends:

The growing need for advanced security solutions that help organizations to recognize

potential threats and vulnerabilities is primarily driving the global security information and event management market. In addition to this, the widespread adoption of SIEM for the segregation of threat alerts based on priority, triaging, and automated response is also catalyzing the market growth. Furthermore, the increasing focus on comprehensive IT governance policies, such as GDPR (General Data Protection Regulation), and compliance with the regulatory framework is augmenting the global market. Apart from this, the rising penetration of cloud-based technology to simplify digital banking processes and reduce associated risks with on-premises security solutions is further creating a positive outlook for the SIEM market. Moreover, the emerging popularity of remote working models, SaaS applications, and the BYOD (Bring Your Own Device) trend is stimulating the requirement for network visibility to mitigate risks from outside the traditional network perimeter. This, in turn, is acting as another significant growth-inducing factor. Beside this, the escalating demand for actionable intelligence to minimize data loss and assist in the prioritization of network-based paradigms is also fueling the SIEM market. Additionally, the introduction of next-gen SIEM solutions integrated with powerful Security Orchestration, Automation, and Response (SOAR) capabilities that handle complex threat identification and incident response protocols in significantly less time than physical teams is projected to drive the global security information and event management market in the coming years.

#### Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global security information and event management (SIEM) market, along with forecasts at the global, regional, and country levels from 2025-2033. The market has been categorized based on component, deployment mode, organization size, application, and industry vertical.

### Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being AT&T Inc., Exabeam, Inc., Fortinet, Inc., Hewlett Packard Enterprise Development LP, International Business Machines Corporation, Logpoint A/S, Logrhythm, Inc., McAfee Corp., Micro Focus International plc, Solarwinds Corporation, Splunk Inc. and Trend Micro Inc.

### Key Questions Answered in This Report

- 1.How big is the security information and event management (SIEM) market?
- 2.What is the future outlook of the security information and event management (SIEM) market?
- 3.What are the key factors driving the security information and event management (SIEM) market?
- 4.Which region accounts for the largest security information and event management (SIEM) market share?
- 5.Which are the leading companies in the global security information and event management (SIEM) market?
