Abstracts

The global seismic services market size reached US\$ 8.4 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 10.6 Billion by 2028, exhibiting a growth rate (CAGR) of 3.95% during 2022-2028.

Seismic services provide essential data and results related to the geophysical properties of the earth's crust and ocean bed. They include designing and pre-planning surveys in two-dimensional (2D) and three-dimensional (3D) models, which help tackle data acquisition, processing, and interpretation challenges. They can offer maps of structures to identify areas for gas deposits and reservoirs, minimize the need for further exploration, and reduce negative environmental impacts. As a result, seismic services are widely utilized in the oil and gas industry for critical exploration and reservoir decision-making.

Seismic Services Market Trends:

The surging consumption of energy on account of rapid urbanization and the rising utilization of electronic appliances is resulting in the increasing number of oil and gas exploratory activities across the globe. This represents one of the major factors contributing to market growth. Seismic services help explorers perform offshore exploration and production (E&P) activities in deeper water. This, along with the development of ultra-deep-water reserves, is also impelling the growth of the market. Moreover, the growing environmental concerns, in confluence with the imposition of stringent regulations on the consumption of fossil fuel by governing agencies of various countries, are driving the demand for liquified natural gas (LNG). This, in turn, is propelling the market growth worldwide. Apart from this, infrastructure facilities are usually subject to potential geohazards, such as landslides and flooding. Consequently,

rising investments in the construction of roads, bridges, buildings, dams, and utilities are positively influencing the demand for seismic services. Furthermore, the introduction of advanced seismic technologies that can provide four-dimensional (4D) quality data for improved reservoir performance is projected to create lucrative opportunities for market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global seismic services market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on type, technology, location of deployment and application.

Breakup by Type:

- Data Acquisition
- Data Processing
- Data Interpretation

Breakup by Technology:

- 2D Imaging
- 3D Imaging
- 4D Imaging

Breakup by Location of Deployment:

- Onshore
- Offshore

Breakup by Application:

- Oil and Gas
- Construction
- Mining
- Others

Breakup by Region:

North America
United States
Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Agile Seismic LLC, Amerapex Corporation, Asian Energy Services Ltd, China National Petroleum Corporation, China Oilfield Services Limited, Echo Seismic Ltd., Halliburton Company, PGS, Pulse Seismic Inc., Schlumberger Limited and SeaBird Exploration.

Key Questions Answered in This Report:

How has the global seismic services market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global seismic services market?

What are the key regional markets?

What is the breakup of the market based on the type?

What is the breakup of the market based on the technology?

What is the breakup of the market based on the location of deployment?

What is the breakup of the market based on the application?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global seismic services market and who are the key players?

What is the degree of competition in the industry?
