Abstracts

The global small satellite market size reached US\$ 4.6 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 8.0 Billion by 2032, exhibiting a growth rate (CAGR) of 6.2% during 2024-2032.

A small satellite, also known as smallsat, refers to a type of low mass and size satellite, usually under 1,200 kg. Based on weight, it is categorized into minisatellite, microsatellite, nanosatellite, picosatellite, and femtosatellite. Small satellites are affordable alternatives that enable commercial enterprises, non-profit groups, and educational institutions to conduct missions in the lower Earth orbit. They make it possible to perform several scientific investigations and technology demonstrations in orbit at a low cost, with relative ease, and within a stipulated time. As a result, small

satellites are extensively utilized for specific applications such as communication and navigation by civil, commercial, military, and government bodies.

Small Satellite Market Trends:

The rising need for remote sensing and Earth observation services across various sectors, including energy, oil & gas, defense, agriculture, etc., is primarily driving the global small satellite market. In addition to this, the widespread utilization of small satellites for communication and navigation owing to the increasing popularity of advanced technologies, such as over-the-top (OTT) services and Internet Protocol Television (IPTV), is also stimulating the global market. Moreover, the elevating demand for LEO-based small satellites to provide low-cost broadband in developing countries is further propelling the market growth. Apart from this, the introduction of small satellites in the telecom industry has led to the acceleration of 5G deployment globally, besides generating new market opportunities for satellite communication (Satcom) companies. This, in turn, is creating a positive outlook for the global market. Additionally, the escalating usage of small satellites by research organizations for academic purposes and technological experimentation in space is acting as another significant growth-inducing factor. For instance, NASA's CubeSat initiative offers educational institutions and NGOs a chance to collaborate on upcoming small satellite launches. Furthermore, the rising integration of numerous innovative technologies, such as robotics, artificial intelligence, machine learning, etc., to ensure efficient communications, improve spacecraft reliability, and enhance coordination is expected to augment the global small satellite market over the forecast period.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global small satellite market report, along with forecasts at the global, regional and country level from 2024-2032. Our report has categorized the market based on component, type, frequency, application and end user.

Breakup by Component:

Payloads and Structures

Electric Power System

Solar Panels and Antenna System

Propulsion System

Others

Breakup by Type:

Mini Satellite
Micro Satellite
Nano Satellite

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being AAC Clyde Space, Airbus SE, Ball Corporation, Blue Canyon Technologies (Raytheon Technologies Corporation), Exolaunch GmbH, GomSpace, L3Harris Technologies Inc., Lockheed Martin Corporation, Millennium Space Systems Inc. (The Boeing Company), Northrop Grumman Corporation, Spire Global Inc. and The Aerospace Corporation.

Key Questions Answered in This Report

1. What was the size of the global small satellite market in 2023?
2. What is the expected growth rate of the global small satellite market during 2024-2032?
3. What are the key factors driving the global small satellite market?
4. What has been the impact of COVID-19 on the global small satellite market?
5. What is the breakup of the global small satellite market based on the component?
6. What is the breakup of the global small satellite market based on the frequency?

7. What is the breakup of the global small satellite market based on application?
8. What is the breakup of the global small satellite market based on the end user?
9. What are the key regions in the global small satellite market?
10. Who are the key players/companies in the global small satellite market?
