Abstracts

Market Overview:

The global smoke grenade market size reached US$ 485.6 Million in 2022. Looking forward, IMARC Group expects the market to reach US$ 670.9 Million by 2028, exhibiting a growth rate (CAGR) of 5.3% during 2023-2028. A considerable rise in geopolitical tensions across the globe, increasing incidences of war and internal conflicts, and the rising demand for harmless smoke grenades in the entertainment industry represent some of the key factors driving the market.

A smoke grenade refers to a closed canister-like device that emits white or colored smoke when ignited and is used for both military and commercial purposes. In a typical smoke grenade, there are four emitter holes on top and one on the bottom that allows smoke to escape when triggered. There is a high degree of visibility of smoke from a distance, and in some grenades, smoke can be deployed for up to a few minutes. Smoke grenades have a longer range and thus spread into a larger area than normal smoke bombs, which are widely used to signal their team members. In addition to marking a location, smoke grenades are also used to make it easier for others to locate a person or place. During combat, an artillery or bombing target can be marked with smoke grenades to identify opponents during combat, blind and disorient them before an assault, or identify positions. Apart from these, smoke grenades also find widespread

+44 20 8123 2220
info@marketpublishers.com

applications in numerous games, firework displays, and festive celebrations.

Smoke Grenade Market Trends:

The market is primarily driven by the increasing incidences of war, crimes and conflicts between several countries. This can be attributed to a considerable rise in geopolitical tensions across the globe. In line with this, the escalating product demand for AIR and naval operations is providing an impetus to the market. Moreover, the rapid product utilization by law enforcement to curb the growing internal violence, protests, and civilian unrest to effectively manage difficult situations and control the crowd is creating a positive market outlook. Continual product innovations, such as the development of advanced handheld multi-shot grenade launchers, are also acting as a significant growth-inducing factor for the market. Besides this, the escalating demand for eco-friendly smoke grenades due to the rising awareness about toxic contamination is creating a positive outlook for the market. In addition to this, the growing usage of harmless smoke grenades for special effects in media, movies and television shows is creating lucrative opportunities in the market. Some of the other factors contributing to the market include rapid urbanization, widespread product utilization in training exercises, reduction in smoke grenade production costs, and the accelerating security concerns among the masses.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global smoke grenade market, along with forecasts at the global, regional, and country level from 2023-2028. Our report has categorized the market based on product, application, and end user.

Product Insights

Burst Smoke Grenade
Wire Pull Smoke Grenade
Micro Smoke Grenade
Others

The report has provided a detailed breakup and analysis of the smoke grenade market based on the product. This includes burst smoke grenade, wire pull smoke grenade, micro smoke grenade, and others. According to the report, burst smoke grenade

+44 20 8123 2220
info@marketpublishers.com

represented the largest segment.

Application Insights

Signaling
Screening and Obscuring
Riot Control
Others

The report has provided a detailed breakup and analysis of the smoke grenade market based on the application. This includes signaling, screening and obscuring, riot control, and others. According to the report, signaling represented the largest segment.

End User Insights

Military and Defense
Law Enforcement
Others

A detailed breakup and analysis of the smoke grenade market based on the end user has also been provided in the report. This includes military and defense, law enforcement, and others. According to the report, military and defense accounted for the largest market share.

Regional Insights

North America

United States
Canada

Asia Pacific

China
Japan
India

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets that include North America (the United States and Canada); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Latin America (Brazil, Mexico, and others); and Middle East and Africa. According to the report, North America was the largest market for smoke grenade. Some of the factors driving the North America smoke grenade market include a considerable rise in internal conflicts, the expanding entertainment industry, continual technological advancements in the development of eco-friendly smoke grenades, etc.

Competitive Landscape:

+44 20 8123 2220
info@marketpublishers.com

The report has also provided a comprehensive analysis of the competitive landscape in the global smoke grenade market. Detailed profiles of all major companies have also been provided. Some of the companies covered include 3rd Light Ltd., Centanex Ltd., Combined Systems Inc., Daekwang Chemical Co. Ltd., Defense Technology LLC (Safariland LLC), Nammo AS, Nonlethal Technologies Inc., Rheinmetall AG, Sport Smoke LLC, etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report:

How has the global smoke grenade market performed so far and how will it perform in the coming years?
What are the drivers, restraints, and opportunities in the global smoke grenade market?
What are the key regional markets?
Which countries represent the most attractive smoke grenade markets?
What is the breakup of the market based on the product?
What is the breakup of the market based on the application?
What is the breakup of the market based on the end user?
What is the competitive structure of the global smoke grenade market?
Who are the key players/companies in the global smoke grenade market?
