Abstracts

South Korea office furniture market size reached USD 1.3 Billion in 2025. Looking forward, IMARC Group expects the market to reach USD 1.7 Billion by 2034, exhibiting a growth rate (CAGR) of 2.89% during 2026-2034. The growing emphasis on employee satisfaction and well-being to maintain productivity and operational efficiency, increasing number of e-commerce platforms, and rising adoption of sustainable materials, eco-friendly manufacturing processes, and energy-efficient design principles represent some of the key factors driving the market.

Office furniture is used in a professional workplace to facilitate productivity and provide comfort to employees. It comprises writing, standing, and conference desks, along with task, executive, guest, and lounge chairs providing comfort. It also consists of filing cabinets, bookshelves, credenzas, and lockers to efficiently store various documents and maintain them for official purposes. It encompasses various furnishings, such as conference tables, modular seating, whiteboards, and presentation equipment, which are essential for meetings and collaboration between stakeholders. It is manufactured using high-quality materials to withstand rigorous usage. It contributes to increased employee productivity by providing comfort, organization, and proper workspace. It is often integrated with ergonomic designs to promote better posture and reduce the risk of physical discomfort or injury. It helps to keep the workspace organized, making it easier to locate and manage documents and supplies. It is often available as modular and adaptable for efficient work environments, allowing for reconfiguration to meet changing needs. It can maximize the use of available office space, potentially reducing

costs associated with larger premises. It also helps to create a comfortable and aesthetically pleasing workspace, which is essential to improve employee morale and job satisfaction, contributing to higher employee retention rates.

SOUTH KOREA OFFICE FURNITURE MARKET TRENDS:

At present, the increasing emphasis on employee satisfaction and well-being to maintain productivity and operational efficiency represents one of the crucial factors impelling the growth of the market in South Korea. Besides this, the rising traction of ergonomic furniture, as it is designed to provide optimal comfort and support to the body and reduce the risk of health problems associated with prolonged sitting or poor posture, is contributing to the market growth. In addition, the growing shift towards open office layouts, favoring collaborative and flexible workspaces, is catalyzing the demand for modular and adaptable furniture solutions that enable dynamic office configurations. Apart from this, the adoption of sustainable materials, eco-friendly manufacturing processes, and energy-efficient design principles is becoming more common as the country aligns with global sustainability goals. Moreover, the integration of technology into office furniture, such as smart desks and chairs with built-in connectivity, wireless charging, and touch-screen capabilities, is catering to the evolving needs of modern workplaces, wherein connectivity and adaptability are crucial. Additionally, the growing emergence of remote and hybrid work arrangements is encouraging organizations to reevaluate their office furniture needs, opting for more flexible and compact solutions that can accommodate a hybrid work model. Furthermore, the rising number of e-commerce platforms selling lightweight office furniture, which are suitable for complementing the interiors of a modern office setup, is bolstering the market growth in the country.
