Abstracts

South Korea paper packaging market size reached USD 8.5 Billion in 2025. Looking forward, IMARC Group expects the market to reach USD 9.8 Billion by 2034, exhibiting a growth rate (CAGR) of 1.58% during 2026-2034. The growing demand for eco-friendly packaging solutions, increasing preferences for sustainable and recyclable packaging options, and rising need for packaging to ensure food safety and freshness represent some of the key factors driving the market.

Paper packaging is a versatile and sustainable packaging solution that protects different products against moisture and contaminants. It is usually available in the form of boxes, bags, and cartons, to enclose and protect items during storage and transportation. It is cost-effective, versatile, and easy to carry and recycled, which reduces environmental impact and maintains eco-friendliness. It can be customized with printing to enhance the visual appeal of products and promote brand recognition. It also allows organizations to include product information, instructions, and marketing messages on the packaging and ensure that individuals have all the necessary details related to the product. It serves as a greener alternative to plastic and other non-biodegradable materials. It provides protection against physical damage, dust, and moisture while ensuring the integrity of the packaged items. It assists in offering a safer and hygienic means of storage and transportation of food products. As a result, paper packaging is widely utilized in the cosmetics, pharmaceutical, food and beverage (F&B), and automotive sectors in South Korea.

SOUTH KOREA PAPER PACKAGING MARKET TRENDS:

At present, increasing preferences for sustainable and recyclable packaging options among people represent one of the primary factors contributing to the growth of the market in South Korea. In line with this, the growing demand for eco-friendly packaging solutions on account of the rising awareness about environmental issues among the masses is offering a positive market outlook in the country. Moreover, the increasing employment of paper packaging in the food and beverage (F&B) sector to pack food products, such as cereals, snacks, bakery items, and beverages, while ensuring food safety and freshness is bolstering the market growth in South Korea. Apart from this, there is a rise in the demand for paper packaging due to the thriving e-commerce industry in the country. This, coupled with the increasing adoption of paper packaging to protect electronic devices during transportation and display, is supporting the market growth. Besides this, the rising application of paper packaging for gift wrapping purposes is strengthening the market growth in South Korea. Additionally, the increasing utilization of paper packaging in the pharmaceutical sector for packaging medicines, medical supplies, and over the counter (OTC) products and providing a safe and sterile option is impelling the market growth. Furthermore, the rising employment of paper-based packaging for storing seed packets and other agricultural products is offering lucrative growth opportunities to industry investors. In addition, governing agencies in South Korea are encouraging the adoption of sustainable packaging solutions. They are also implementing stringent rules and regulations to reduce greenhouse gas (GHG) emissions in the environment.
