## Abstracts

The global sweet biscuit market size reached US\$ 87.2 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 113.6 Billion by 2028, exhibiting a growth rate (CAGR) of 4.43% during 2023-2028.

Sweet biscuits are flour-based baked products manufactured using sugar or salt, butter or vegetable shortening, and baking powder. Cookies, filled, chocolate-coated, plain, and sandwiches are some commonly available sweet biscuits that can be coated with a layer of custard, jam, creme, or chocolate filling. These items are rich in fibers, carbohydrates, vitamins, minerals, and fats that are essential to human health. They are widely available in various shapes, flavors, toppings, fillings, and colors. Sweet biscuits are cost-effective, easy-to-find, and easy-to-eat food with a long shelf life, making them ideal for snacking.

### Sweet Biscuit Market Trends:

The increasing demand for ready-to-eat (RTE) food products among the masses due to hectic lifestyles and busy schedules is driving the market growth. Additionally, the shifting consumer preferences toward healthy snacking options due to the rising lifestyle-related disorders, such as obesity, and the increasing awareness about personal well-being is favoring the market growth. In line with this, manufacturers are actively indulging in the production of healthy biscuits in different flavors to enhance the product taste, which, in turn, is propelling the market growth. Apart from this, the introduction of low-fat, low-carb, organic, and high-fiber biscuits manufactured using organic and natural ingredients is providing an impetus to the market growth. Moreover, the launch of gluten-free sweet biscuits that help alleviate intestinal and dietary issues and are widely consumed by lactose intolerant and celiac patients is acting as another growth-inducing factor. Furthermore, key players are focusing on manufacturing oat-based, nut-

based, and high-fiber biscuits in attractive packaging to expand their customer base and gain a competitive edge, which is augmenting the market growth. Other factors, including rising expenditure capacities of consumers, rapid urbanization, and easy product availability across e-commerce platforms, are anticipated to drive the market growth.
