Abstracts

Market Overview:

The global tattoo removal market size reached US\$ 267.2 Million in 2022. Looking forward, IMARC Group expects the market to reach US\$ 421.7 Million by 2028, exhibiting a growth rate (CAGR) of 7.6% during 2023-2028. The increasing popularity of tattoos as a form of self-expression, advancements in laser technology, and the growing regulations in industries represent some of the key factors driving the market.

Tattoo removal refers to the process of lightening or removing a pregnant tattoo from the skin through a variety of methods, including laser removal, excision, and dermabrasion. Amongst these, laser tattoo removal is one of the most common methods and involves the use of high-intensity light to break up the ink particles in the skin. The broken-down particles are then removed by the body's immune system. The components used in laser tattoo removal include a laser machine, a cooling system, and protective eyewear. Tattoo removal is a safe, easy, and effective method for erasing ink from every skin surface of the body. In addition, it also helps to enhance self-confidence, improve, correct, and modify an old tattoo into a new design.

Tattoo Removal Market Trends:

The burgeoning popularity of tattoos as a form of self-expression is one of the key factors creating a positive outlook for the market. In line with this, the shifting lifestyle preferences, increasing impulsive decisions, and rising prevalence of tattoo regrets among young adults and millennials are acting as another growth-inducing factor. Additionally, advancements in laser technology have made tattoo removal procedures more effective and less invasive, attracting a larger customer base, which is further

fueling the market growth. Moreover, the growing regulations in industries, such as the military, law enforcement, healthcare, and customer-facing roles to comply with professional requirements are providing an impetus to the market growth. Additionally, the surging influence of social media and the desire for a clean aesthetic has led to a surge in demand for tattoo removal, further propelling the market growth. Furthermore, the availability of various tattoo removal techniques, such as laser, surgical excision, and tattoo removal creams, which in turn is positively influencing the market growth. In line with this, the increasing number of tattoo studios, and the presence of well-established market players are facilitating the market growth. Apart from this, the rise in tattoo-related complications and infections has driven individuals to seek professional tattoo removal services, which is providing a considerable thrust to the market growth. Other factors, such as the increasing awareness about the potential risks and complications associated with tattoo inks and the need for safe tattoo removal procedures, are stimulating the market growth.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global tattoo removal market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on treatment type and end user.

Treatment Type Insights:

- Laser Therapy
- Surgical Procedure
- Topical Creams
- Others

The report has provided a detailed breakup and analysis of the tattoo removal market based on the treatment type. This includes laser therapy, surgical procedure, topical creams, and others. According to the report, the laser therapy segment dominates the market.

End User Insights:

- Hospitals
- Clinics
- Others

The report has provided a detailed breakup and analysis of the tattoo removal market based on the end user. This includes hospitals, clinics, and others. As per the report, the hospitals segment holds the largest market share.

Regional Insights:

North America

United States

Canada

Asia-Pacific

China

Japan

India

South Korea

Australia

Indonesia

Others

Europe

Germany

France

United Kingdom

Italy

Spain

Russia

Others

Latin America

Brazil

Mexico

Others

Middle East and Africa

The report has also provided a comprehensive analysis of all the major regional markets, which include North America (the United States and Canada); Europe (Germany, France, the United Kingdom, Italy, Spain, Russia, and others); Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, and others); Latin America (Brazil, Mexico, and others); and the Middle East and Africa. As per the report, North America dominates the market. Some of the factors accelerating the North America tattoo removal market include the increasing popularity of tattoos, the growing availability of advanced technology and equipment for tattoo removal, and the

implementation of strict regulations at workplace.

Competitive Landscape:

The report has also provided a comprehensive analysis of the competitive landscape in the global tattoo removal market. Competitive analysis such as market structure, market share by key players, player positioning, top winning strategies, competitive dashboard, and company evaluation quadrant has been covered in the report. Also, detailed profiles of all major companies have been provided. Some of the companies covered include Alma Lasers Ltd (Sisram Medical Ltd), Astanza Laser LLC, Bison Medical Co. Ltd., Candela Laser Corporation, Cryomed Aesthetics, Cutera Inc., Cynosure LLC, Fotona d.o.o., Lumenis Ltd., Lutronic Corporation, Quanta System S.p.A. and The Global Beauty Group, etc. Kindly note that this only represents a partial list of companies, and the complete list has been provided in the report.

Key Questions Answered in This Report

1. What was the size of the global tattoo removal market in 2022?
2. What is the expected growth rate of the global tattoo removal market during 2023-2028?
3. What are the key factors driving the global tattoo removal market?
4. What has been the impact of COVID-19 on the global tattoo removal market?
5. What is the breakup of the global tattoo removal market based on the treatment type?
6. What is the breakup of the global tattoo removal market based on the end user?
7. What are the key regions in the global tattoo removal market?
8. Who are the key players/companies in the global tattoo removal market?
