Abstracts

The global toluene market size reached US\$ 28.9 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 44.0 Billion by 2032, exhibiting a growth rate (CAGR) of 4.6% during 2024-2032. The increasing product demand in industrial applications, the rising expansion of the automotive industry, the growing construction and infrastructure projects, and the escalating product adoption in the oil and gas sector are some of the factors propelling the market.

Toluene Market Analysis:

Major Market Drivers: The toluene market recent developments highlight increasing demand for benzene and xylene production and extensive use in petrochemical applications as primary drivers which are accelerating the market growth.

Key Market Trends: The market forecast projects significant growth driven by its essential role in the production of high-quality gasoline and expanding use as a solvent across various industries.

Geographical Trends: The toluene market report indicates that Asia Pacific dominates the market, fueled by rapid industrialization and expansion in chemical, automotive, and electronics sectors, particularly in China and India.

Competitive Landscape: Major companies are increasing the production and focusing on R&D to innovate and create sustainable solutions, securing a competitive edge in the global market.

Challenges and Opportunities: Environmental regulations pose challenges, but the toluene market recent opportunities in developing bio-based and low-VOC toluene alternatives are set to drive future market innovation and adaptation.

Toluene, a colorless and water-soluble liquid, with a sweet, characteristic odor, is a valentine aromatic hydrocarbon. This organic compound is main industrial chemical solvent, found in a wide range of industrial applications. It is a vital compound used for many chemicals including a derivative in the manufacturing of benzene, a precursor in plastics, resins, and synthetic fibers. Toluene serves as an essential component in the manufacture of all kinds of paints, such as wood stain, automotive finishes, enamel, and varnish. Besides, it plays a crucial part in production of the glues, and other inks. Additionally, it is an essential ingredient in gasoline, which provides a boost to the octane rating and improves the engine performance.

The global market is majorly driven by the increasing product demand in the production of benzene and xylene. In line with this, the rising product adoption in the petrochemical industry is significantly contributing to the market. As per the toluene market forecast, the pharmaceutical sector's continuous expansion and the demand for specialty chemicals are expected to sustain the market growth. Furthermore, the extensive use of toluene as a solvent in various applications such as paints, coatings, adhesives, and pharmaceuticals is expanding its market presence. Besides, the growing automotive and construction sectors are increasing the demand for toluene-based products, including rubber and thinners for lacquers and varnishes. Toluene's importance in producing explosives, particularly TNT, and its role as a high-octane additive in aviation and racing fuel its market growth. The increasing emphasis on sustainability and the development of bio-based toluene alternatives are stimulating innovation in the industry. Additionally, stringent environmental regulations and safety concerns encourage the adoption of toluene substitutes, but the market is adapting by producing low-VOC (Volatile Organic Compounds) formulations.

Toluene Market Trends/Drivers:

Increasing product use in the production of electronic components

Toluene market growth is heavily determined by the expanding usage of the product in the manufacture of electronic parts. This organic solvent has a wide range of application in the electronics industry and is largely used for manufacture of semiconductor, printed circuit boards, and various electronic devices. The continuous technological development and the increasing toluene demand to make advanced consumer electronics including smartphone, laptop and other products underline its crucial

position. The distinct properties of toluene make them irreplaceable in the dissolution and processing of materials to support the microelectronics and semiconductor sectors in the process of device miniaturization and enhancement of functionality.

Rising product uptake in gasoline blends

The toluene market trends are driven by the increasing demand for the current gasoline blends. With such an amazing octane grade, toluene is one of the main ingredients in gasoline production increasing engine performance and fuel efficiency raising emissions level. This trend is vital, especially due to the global automotive industry that is currently trying to address environmental standards. The car ownership expansion in developing markets fueled by the rapid expansion of the middle-class further augments the toluene market share and emphasizes its pivotal function in attaining the desirable standards of clean fuels.

A 2022 report from Argus Media indicates that European toluene prices are expected to be supported in 2023 by strong demand for high-octane components, especially from gasoline blenders during the peak summer driving season.

Expansion of the end-use industries

The expansion of numerous end-use industries provides sizable avenues for toluene market growth. Toluene is an integral feedstock and solvent used in sectors such as chemicals, paints & coatings, pharmaceuticals, petrochemicals, which are witnessing vigorous world growing trend. The chemical industry has a unique way of using the toluene in synthesizing compounds, such as benzene and xylene, and in paints and pharmaceuticals. As these industries escalate their expansion to meet the toluene demand in the market, they push up the toluene market revenue by influencing the overall market.

Toluene Industry Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the global toluene market report, along with forecasts at the global and regional levels from 2024-2032. Our report has categorized the market based on technology and application.

Breakup by Technology:

Reformation Process

Toluene Market Report by Technology (Reformation Process, Pygas Process, Coke/Coal Process, Styrene Process),...

Pygas Process
Coke/Coal Process
Styrene Process

Reformation process dominates the market

The report has provided a detailed breakup and analysis of the market based on the technology. This includes the reformation process, pygas process, coke/coal process, and styrene process. According to the report, reformation process represented the largest segment.

The toluene market overview shows that the production of toluene mainly occurs through the reformation of naphtha and the process known as pygas. These technologies are the essential part in toluene production and in the scope of expanding the demand of petrochemical derivatives. The reforming process of naphtha and the extracting from pyrolysis gasoline provide the nonstop toluene flow, which is necessary to satisfy the unique needs of various industries, including chemical, plastic, and automotive.

Breakup by Application:

Gasoline
STDP/TPX
Solvents
Trans Alkylation (TA)
Hydrodealkylation
Toluene Diisocyanate (TDI)
Toluene Disproportionation (TDP)
Others

Gasoline dominates the market

The report has provided a detailed breakup and analysis of the market based on the application. This includes gasoline, STDP/TPX, solvents, trans alkylation (TA), hydrodealkylation, toluene diisocyanate (TDI), toluene disproportionation (TDP), and others. According to the report, gasoline represented the largest segment.

In terms of fuel production, gasoline functions as a blending agent with the higher octane rating. The global toluene market analysis concentrates on the significance of

enhancing the quality of gasoline, which is becoming more crucial as the global automotive sector increases. The growing ownership of vehicles and release of stricter standards on emissions are the key factors which make toluene an essential additive in the process of raising the quality of fuel, and thus aid in the upgrading of engine efficiency while reducing emission.

According to a 2015 report by the International Energy Agency, Saudi Arabia has introduced fuel-economy labeling for new cars and established fuel-economy standards. Concurrently, Iran implemented new energy conservation plans in 2014 to decrease gasoline and diesel consumption in the transportation sector.

Breakup by Region:

Asia Pacific

North America

Europe

Middle East and Africa

Latin America

Asia Pacific exhibits a clear dominance, accounting for the largest market share

The market research report has also provided a comprehensive analysis of all the major regional markets, which include Asia Pacific, North America, Europe, Middle East and Africa, and Latin America. According to the report, Asia Pacific accounted for the largest market share.

The toluene market outlook in the Asia Pacific region is particularly strong. With a number of countries in the region, including China and India going through rapid industrialisation and the expansion of manufacturing facilities, the region has now become a big consumer and producer of toluene. The power of the market growth in this area is due to the rise of entities, such as chemical, textile, electronics, and automotive that use toluene for producing coatings, paints, and adhesives. The growing urbanization as well as the infrastructure development further step up the demand for the products and consequently cement Asia Pacific's leading role in the global toluene market.

According to a McKinsey and Company report, India is projected to contribute over 20 percent of the global increase in chemical consumption over the next twenty years. Domestic demand for chemicals in India is anticipated to grow from approximately \$170

billion to \$180 billion in 2021 to between \$850 billion and \$1,000 billion by 2040.

Competitive Landscape:

The market research report has also provided a comprehensive analysis of the competitive landscape in the market. Detailed profiles of all major companies have also been provided. Some of the major market players in the toluene industry include:

Exxon Mobil Corporation

SK Global

British Petroleum

Versalis

Compañía Española De Petroleos S.A.

(Please note that this is only a partial list of the key players, and the complete list is provided in the report.)

The toluene companies are huge producers in the chemical and petrochemical industries are now scaling their production facilities so that they can cater to the increased global demand. Their research and development endeavours have brought new applications of toluene and revolutionized production mechanism, thus making them more productive and sustainable. These leading producers help to establish markets and, as a result, create a larger, constant stream of customers. Furthermore, sustainable organizations are in line with international environmental regulations, and they attract much more international eco-conscious audience.

Toluene Market News:

On 15th April 2024, Versalis recently announced the acquisition of Tecnofilm, expanding in the compounding sector.

On 6th September 2023, British Petroleum entered a third long-term liquefied natural gas (LNG) offtake contract from Woodfibre's British Columbia LNG facility.

On 1st December 2022, Cepsa invested 3 billion euros in Andalusia to build the largest green hydrogen hub in Europe.

Key Questions Answered in This Report:

How has the global toluene market performed so far, and how will it perform in the coming years?

What are the drivers, restraints, and opportunities in the global toluene market?

What is the impact of each driver, restraint, and opportunity on the global toluene market?

What are the key regional markets?

Which countries represent the most attractive toluene market?

What is the breakup of the market based on the technology?

Which is the most attractive technology in the toluene market?

What is the breakup of the market based on the application?

Which is the most attractive application in the toluene market?

What is the competitive structure of the global toluene market?

Who are the key players/companies in the global toluene market?

1 PREFACE

2 SCOPE AND METHODOLOGY

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
 - 2.3.1 Primary Sources
 - 2.3.2 Secondary Sources
- 2.4 Market Estimation
 - 2.4.1 Bottom-Up Approach
 - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology

3 EXECUTIVE SUMMARY

4 INTRODUCTION

- 4.1 Overview
- 4.2 Properties
- 4.3 Key Industry Trends

5 GLOBAL TOLUENE MARKET

- 5.1 Market Overview
- 5.2 Market Performance
 - 5.2.1 Volume Trends
 - 5.2.2 Value Trends
- 5.3 Impact of COVID-19
- 5.4 Price Trends
- 5.5 Market Breakup by Technology
- 5.6 Market Breakup by Application
- 5.7 Market Breakup by Region
- 5.8 Market Forecast
- 5.9 SWOT Analysis
 - 5.9.1 Overview
 - 5.9.2 Strengths

- 5.9.3 Weaknesses
- 5.9.4 Opportunities
- 5.9.5 Threats
- 5.10 Value Chain Analysis
 - 5.10.1 Overview
 - 5.10.2 Research and Development
 - 5.10.3 Raw Material Procurement
 - 5.10.4 Manufacturing
 - 5.10.5 Marketing
 - 5.10.6 Distribution
 - 5.10.7 End-Use
- 5.11 Porters Five Forces Analysis
 - 5.11.1 Overview
 - 5.11.2 Bargaining Power of Buyers
 - 5.11.3 Bargaining Power of Suppliers
 - 5.11.4 Degree of Competition
 - 5.11.5 Threat of New Entrants
 - 5.11.6 Threat of Substitutes

6 MARKET BREAKUP BY TECHNOLOGY

- 6.1 Reformation Process
 - 6.1.1 Market Trends
 - 6.1.2 Market Forecast
- 6.2 Pygas Process
 - 6.2.1 Market Trends
 - 6.2.2 Market Forecast
- 6.3 Coke/Coal Process
 - 6.3.1 Market Trends
 - 6.3.2 Market Forecast
- 6.4 Styrene Process
 - 6.4.1 Market Trends
 - 6.4.2 Market Forecast

7 MARKET BREAKUP BY APPLICATION

- 7.1 Gasoline
 - 7.1.1 Market Trends
 - 7.1.2 Market Forecast

7.2 STDP/TPX

7.2.1 Market Trends

7.2.2 Market Forecast

7.3 Solvents

7.3.1 Market Trends

7.3.2 Market Forecast

7.4 Trans Alkylation (TA)

7.4.1 Market Trends

7.4.2 Market Forecast

7.5 Hydrodealkylation

7.5.1 Market Trends

7.5.2 Market Forecast

7.6 Toluene Diisocyanate (TDI)

7.6.1 Market Trends

7.6.2 Market Forecast

7.7 Toluene Disproportionation (TDP)

7.7.1 Market Trends

7.7.2 Market Forecast

7.8 Others

7.8.1 Market Trends

7.8.2 Market Forecast

8 MARKET BREAKUP BY REGION

8.1 Asia Pacific

8.1.1 Market Trends

8.1.2 Market Forecast

8.2 North America

8.2.1 Market Trends

8.2.2 Market Forecast

8.3 Europe

8.3.1 Market Trends

8.3.2 Market Forecast

8.4 Middle East and Africa

8.4.1 Market Trends

8.4.2 Market Forecast

8.5 Latin America

8.5.1 Market Trends

8.5.2 Market Forecast

9 IMPORTS AND EXPORTS

9.1 Imports

9.2 Exports

10 TOLUENE MANUFACTURING PROCESS
