Market Overview:

The global travel technology market size reached US\$ 9.3 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 14.2 Billion by 2028, exhibiting a growth rate (CAGR) of 7.5% during 2023-2028.

Travel technology refers to the integration of information and communication technology in the travel, tourism and hospitality industry. It allows organizations to automate various processes, such as booking and tracking flights, hotels, tours and enable a common interface to connect travel agents with the consumers. It also aids in creating customized itineraries, finding the most suitable prices and schedules, converting currency, managing travel insurance and offering travel advice to the user.

Significant growth in the travel and tourism sector, along with the rising need for automation across industries, is among the key factors driving the market. Furthermore, widespread adoption of artificial intelligence (AI) and SaaS-based models are also providing a boost to the market growth. For instance, organizations are increasingly employing robotic process automation (RPA) to streamline and automatically process applications, manage bookings and paperwork to minimize human errors. Also, AI provides interactive conversational platforms, such as virtual support agents and chatbots, that can directly address the consumer's requirements, thereby enhancing their overall experience. Additionally, various technological advancements, including the employment of recognition technologies and the integration with the Internet of Things (IoT) and the adoption of smart devices, are also creating a positive impact on the market growth. Various fingerprint and facial recognition systems are employed in

hotels and other public spaces to automate check-in, check-out and payment processes. Other factors, including rapid urbanization, increasing consumer expenditure capacities and extensive research and development (R&D) activities, are projected to drive the market in the coming years.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global travel technology market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on product type and application.
