Abstracts

The Tunisia couscous market size reached 163,100 Tonnes in 2023. Looking forward, IMARC Group expects the market to reach 196,900 Tonnes by 2032, exhibiting a growth rate (CAGR) of 2.1% during 2024-2032.

Couscous refers to a type of North African food that is prepared by crushed and steamed semolina made of durum wheat. Apart from being versatile and economical, couscous is loaded with nutritional qualities and provides macro and micro-nutrients required in a balanced diet. Couscous is the national dish of Tunisia and is generally served as a main course by combining sauces, meat, and vegetables, or as dessert, salad, sides, etc.

Owing to the growing working population with hectic and stressful lifestyles; convenient and easy-to-cook food products, such as couscous, have gained increasing popularity in the region. Furthermore, the rapid consumer shift towards high-protein and low-calorie diet in Tunisia has further catalyzed the demand for couscous. Additionally, couscous is convenient, affordable, and can be used in various traditional Tunisian recipes by mixing it with lamb meat, fish meat, or dry fruits, etc. Moreover, catalyzed by the rapid growth of the foodservice sector, along with the strengthening of retail channels in the country, the consumption of couscous is expected to rise in the coming years.
