Abstracts

The United States online food delivery market size reached US\$ 26.1 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 46.5 Billion by 2028, exhibiting a growth rate (CAGR) of 10% during 2023-2028.

Online food delivery is the process of ordering food from a food service provider using a mobile application or webpage. These applications and web pages provide filters and various paying methods, which include, prepaid cards, cash on delivery, net banking, etc., catering to the requirements of the consumers. Moreover, various companies allow their consumers to create an account for frequent and convenient ordering. Online food delivery offers numerous advantages. This includes easy and fast ordering, less hassle, fewer misunderstanding and miscommunication, minimum human interaction and various cashback offers. Additionally, online food delivery companies provides consumers with a wide variety of food items available on their smartphones and the convenience of getting the food delivered at their doorsteps. As a result, online food delivery has become extremely popular in the United States, particularly among the younger population.
