## **Abstracts**

The US healthcare advertising market size reached US\$ 23.5 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 33.8 Billion by 2032, exhibiting a growth rate (CAGR) of 4% during 2024-2032. The growing online direct-to-consumer drug advertising due to the shift in promotional activities towards digital platforms, the augmenting demand to obtain certification and bid for relevant keywords among advertisers, and increased advertising expenditure from healthcare organizations are among the key factors driving the market growth.

Healthcare advertising refers to the strategic promotion and marketing activities undertaken by organizations within the healthcare industry to raise awareness, inform, and influence target audiences about their products, services, or healthcare-related initiatives. It is a specialized form of advertising that caters to the unique needs and regulations of the healthcare sector. Healthcare advertising encompasses a wide range of mediums, including television, print, digital platforms, and direct marketing channels. The primary objective of healthcare advertising is to communicate key messages, build brand recognition, establish credibility, and drive patient engagement or adoption of healthcare solutions. Effective healthcare advertising plays a crucial role in shaping brand perception, driving patient loyalty, and fostering positive patient-provider relationships in a highly competitive industry.

The United States pharmaceutical industry is primarily driven by online direct-to-consumer drug advertising due to the shift in promotional activities towards digital platforms. This can be attributed to the rising popularity of online display advertising,

product websites, and social media campaigns driving higher product sales. In line with this, the augmenting demand to obtain certification and bid for relevant keywords among advertisers is also creating lucrative opportunities in the market. Furthermore, pharmaceutical companies are adopting multiple synchronized communication channels to expand their consumer reach, thereby fueling the market. Additionally, continual advancements in technology enabling the consumers to access relevant information about health conditions and available treatment options are impelling the market growth. The market expansion is further fueled by increased advertising expenditure from healthcare organizations through television, print ads, and social media due to the rapid digital transformation of the healthcare system.

#### US Healthcare Advertising Market Trends/Drivers:

##### Increasing Adoption of Patient-Centered Care and Consumer Empowerment

The increasing emphasis on patient-centered care and consumer empowerment has become a major driving factor for the market. Healthcare organizations are recognizing the importance of attracting and engaging patients through strategic advertising investments. The healthcare organizations are adopting innovative advertising strategies, such as promoting services, showcasing patient success stories, and communicating personalized care approaches. This is helping them establish meaningful connections with their target audience, thereby enhancing patient satisfaction and the overall healthcare experience. Through effective patient-centered advertising, healthcare providers can empower consumers, enabling them to make informed decisions about their healthcare and treatment options. This is expected to create a positive market outlook.

##### The rise of digital platforms and advancements in technology

The rise of digital platforms and advancements in technology has revolutionized the field of healthcare advertising. With the widespread use of smartphones, social media, and online search platforms, the way healthcare information is accessed and shared has undergone a significant transformation. Digital advertising provides healthcare organizations with new avenues to reach their target audience with precision and effectiveness. It enables the targeting of specific patient demographics, the delivery of tailored messages, and the ability to track campaign performance more accurately. Also, the interactive nature of digital platforms allows for enhanced engagement and encourages patient participation, ultimately leading to improved patient outcomes.

#### US Healthcare Advertising Industry Segmentation:

IMARC Group provides an analysis of the key trends in each segment of the US healthcare advertising market report, along with forecasts for the period 2024-2032. Our report has categorized the market based on product type.

#### Breakup by Product Type:

Pharmaceuticals (Small Molecule Drugs)

Biopharmaceuticals

Vaccines

Over-the-Counter (OTC) Drugs

Pharmaceuticals (small molecule drugs) represent the most widely used product type

The report has provided a detailed breakup and analysis of the market based on the product type. This includes pharmaceuticals (small molecule drugs), biopharmaceuticals, vaccines and over-the-counter drugs. According to the report, pharmaceuticals (small molecule drugs) represented the largest segment.

The increasing prevalence of chronic diseases such as cardiovascular conditions, diabetes, and respiratory disorders is fueling the demand for small molecule drugs in the US healthcare advertising market. Advertisements are instrumental in raising awareness about available treatment options for patients suffering from these chronic illnesses. Additionally, ongoing research and development activities in the pharmaceutical industry contribute to the introduction of new drugs, which are then promoted through advertising campaigns. These factors are fueling the segment growth.

On the other hand, considerable growth in the biotechnology industry has given rise to biopharmaceuticals derived from biological sources, leading to increased advertising efforts. With the emergence of more biotech companies, advertising plays a pivotal role in promoting innovative treatments developed through biotechnology.

Biopharmaceuticals often offer targeted therapies tailored to specific diseases or patient populations, and advertising helps reach healthcare professionals and patients who can benefit from these specialized treatments, which in turn is driving the segment.

Additionally, favorable government initiatives and public health campaigns promoting vaccination programs have a significant impact on the US healthcare advertising market for vaccines. Advertisements are crucial in educating the public about the importance of immunization, especially during outbreaks or pandemics, and help dispel

misconceptions surrounding vaccines. With expanding vaccination recommendations for new age groups or indications, advertising efforts are essential to reach the target population and ensure vaccine uptake.

Furthermore, the accessibility and convenience of over-the-counter (OTC) drugs without a prescription is driving the segment. Advertisements play a key role in informing consumers about the availability and uses of OTC products for common ailments, promoting self-care and convenience. With increasing consumer empowerment and proactive health management, advertising empowers consumers by providing information about OTC remedies and aligning with health and wellness trends such as natural or holistic approaches to healthcare.

#### Competitive Landscape:

The top players in the US healthcare advertising market are focusing on digital marketing and technological advancements to reach a wider audience. They are leveraging online channels, social media platforms, and targeted digital advertising campaigns to expand their consumer base and drive product sales. Additionally, they are emphasizing data-driven marketing approaches, utilizing analytics and customer insights to deliver personalized and relevant advertising messages to healthcare professionals and patients. Besides this, the major companies are investing in strategic partnerships and collaborations with pharmaceutical companies, healthcare providers, and digital agencies to enhance their service offerings and access new markets. Additionally, the key players are adopting emerging trends such as mobile advertising, artificial intelligence, and virtual reality to stay ahead of the competition and provide cutting-edge advertising solutions.

The report has provided a comprehensive analysis of the competitive landscape in the market. Detailed profiles of all major companies have also been provided. Some of the key players in the market include:

Johnson & Johnson Services, Inc.  
Pfizer Inc.  
Merck & Co., Inc.  
GlaxoSmithKline plc.  
Eli Lilly and Company  
Novartis International AG  
Sanofi S.A  
AstraZeneca PLC  
F. Hoffmann-La Roche Ltd. (Roche)

Bayer AG  
Bristol- Myers Squibb (BMS)

### Key Questions Answered in This Report

1. What was the size of the US healthcare advertising market in 2023?
2. What is the expected growth rate of the US healthcare advertising market during 2024-2032?
3. What are the key factors driving the US healthcare advertising market?
4. What has been the impact of COVID-19 on the US healthcare advertising market?
5. What is the breakup of the US healthcare advertising market based on the product type?
6. Who are the key players/companies in the US healthcare advertising market?

## Contents

### **1 PREFACE**

### **2 SCOPE AND METHODOLOGY**

- 2.1 Objectives of the Study
- 2.2 Stakeholders
- 2.3 Data Sources
  - 2.3.1 Primary Sources
  - 2.3.2 Secondary Sources
- 2.4 Market Estimation
  - 2.4.1 Bottom-Up Approach
  - 2.4.2 Top-Down Approach
- 2.5 Forecasting Methodology
- 2.6 Study Assumptions

### **3 EXECUTIVE SUMMARY**

### **4 AN OVERVIEW OF HEALTHCARE ADVERTISING IN THE UNITED STATES**

### **5 WHAT DRIVES THE HEALTHCARE ADVERTISING MARKET IN THE US?**

- 5.1 Digitalization and other Technological Advancements
- 5.2 Increasing Presence of Generic and Me-too Drugs
- 5.3 Government Regulations Supporting DTC Advertising
- 5.4 Launch of New Drugs
- 5.5 Increased Consumer Reach through Mobile Advertising
- 5.6 Other Key Drivers

### **6 HEALTHCARE ADVERTISING MARKET: VALUE CHAIN**

- 6.1 DTC Advertising
- 6.2 Detailing

### **7 CURRENT TRENDS IN HEALTHCARE ADVERTISING**

- 7.1 Focus on Content
- 7.2 Rise of Multichannel Marketing
- 7.3 Targeting Consumers with Local Advertising
- 7.4 Reliance on Social Media
- 7.5 Surging Mobile Marketing
- 7.6 Consumers Becoming Researchers
- 7.7 Information Dispensed through Videos
- 7.8 Increasing Importance of Online Reviews

## **8 US HEALTHCARE ADVERTISING MARKET: SWOT ANALYSIS**

- 8.1 Overview
- 8.2 Strengths
- 8.3 Weaknesses
- 8.4 Opportunities
- 8.5 Threats

## **9 US HEALTHCARE ADVERTISING MARKET: PORTER'S FIVE FORCES ANALYSIS**

- 9.1 Overview
- 9.2 Bargaining Power of Buyers
- 9.3 Bargaining Power of Suppliers
- 9.4 Degree of Rivalry
- 9.5 Threat of New Entrants
- 9.6 Threat of Substitutes

## **10 US HEALTHCARE ADVERTISING MARKET**

- 10.1 Historical and Current Market Trends
- 10.2 Impact of COVID-19
- 10.3 Market Breakup by Product Type
  - 10.3.1 Pharmaceuticals (Small Molecule Drugs) Advertising Market
    - 10.3.1.1 Historical, Current and Future Trends
    - 10.3.1.2 Market Breakup by Advertising Channel
    - 10.3.1.3 Advertising Spend by Key Players
  - 10.3.2 Biopharmaceuticals Market
    - 10.3.2.1 Historical, Current and Future Market Trends

- 10.3.2.2 Market Breakup by Advertising Channel
- 10.3.2.3 Advertising Spend by Key Players
- 10.3.3 Vaccines Market
  - 10.3.3.1 Historical, Current and Future Market Trends
  - 10.3.3.2 Market Breakup by Advertising Channel
  - 10.3.3.3 Advertising Spend by Key Players
- 10.3.4 Over-the-Counter Drugs Market
  - 10.3.4.1 Historical, Current and Future Market Trends
  - 10.3.4.2 Market Breakup by Channel
  - 10.3.4.3 Advertising Spend by Key Players

## **11 MAJOR PLAYERS: SALES AND ADVERTISING SPEND**

- 11.1 Advertising Spend by Major Pharma Companies
  - 11.1.1 Johnson & Johnson
    - 11.1.1.1 US Sales
    - 11.1.1.2 Advertising Spend by Channel
    - 11.1.1.3 Global Sales and Advertising Spend
  - 11.1.2 Pfizer
    - 11.1.2.1 US Sales
    - 11.1.2.2 Advertising Spend by Channel
    - 11.1.2.3 Global Sales and Advertising Spend
  - 11.1.3 Merck & Co.
    - 11.1.3.1 US Sales
    - 11.1.3.2 Advertising Spend on Different Segments
    - 11.1.3.3 Global Sales and Advertising Spend
  - 11.1.4 Glaxosmith Kline
    - 11.1.4.1 US Sales
    - 11.1.4.2 Advertising Spend on Different Segments
    - 11.1.4.3 Global Sales and Advertising Spend
  - 11.1.5 Eli Lilly
    - 11.1.5.1 US Sales
    - 11.1.5.2 Advertising Spend on Different Segments
    - 11.1.5.3 Global Sales and Advertising Spend
  - 11.1.6 Novartis
    - 11.1.6.1 US Sales
    - 11.1.6.2 Total Sales of Different Segments
    - 11.1.6.3 Global Sales and Advertising Spend
    - 11.1.6.4 Global Sales and Advertising Spend

#### 11.1.7 Sanofi

##### 11.1.7.1 US Sales

##### 11.1.7.2 Advertising Spend on Different Segments

##### 11.1.7.3 Global Sales and Advertising Spend

#### 11.1.8 AstraZeneca

##### 11.1.8.1 US Sales

##### 11.1.8.2 Advertising Spend on Channel

##### 11.1.8.3 Global Sales and Advertising Spend

#### 11.1.9 Roche

##### 11.1.9.1 US Sales

##### 11.1.9.2 Advertising Spend on Different Segments

##### 11.1.9.3 Global Sales and Advertising Spend

#### 11.1.10 Bayer Healthcare

##### 11.1.10.1 US Sales

##### 11.1.10.2 Advertising Spend on Different Channel

##### 11.1.10.3 Global Sales and Advertising Spend

#### 11.1.11 Bristol- Myers Squibb

##### 11.1.11.1 US Sales

##### 11.1.11.2 Advertising Spend by Channels

##### 11.1.11.3 Global Sales and Advertising Spend

## 12 MARKET CHALLENGES

### 12.1 Trust Gap between Consumers and Advertisers

### 12.2 Strict Rules and Regulations by FDA

### 12.3 Unethical Practices

### 12.4 Macroeconomic Scenario

### 12.5 Other Challenges
