Market Overview 2023-2028:

The global whole milk powder market size reached 6.2 Million Tons in 2022. Looking forward, IMARC Group expects the market to reach 7.5 Million Tons by 2028, exhibiting a growth rate (CAGR) of 3.2% during 2023-2028.

Whole milk powder is derived by removing water from fresh pasteurized, homogenized, or non-homogenized milk through evaporation or spray-drying. It can also be manufactured by blending fluid, condensed, or non-fat dry milk with liquid or dry cream. It is characterized by a creamy flavor, light cream color, and pleasing taste. Its moisture is removed, which further assists in inhibiting microbial growth and providing the same nutritional properties as regular milk. Moreover, as it is easy to handle, store, and disperse in water, has a long shelf-life, and provides a cost-efficient source of milk fats, it is widely utilized in manufacturing a wide range of food products.

Whole Milk Powder Market Trends:

The flourishing food and beverage (F&B) industry represents one of the significant drivers positively influencing the use of whole milk powder in recombined milk, baby food and infant formulas, and energy foods, beverages, and toppings. In addition, the escalating demand for baby food and infant formulas on account of the busy lifestyle of working parents and their rising concerns about the overall development of their children is contributing to the market growth. Apart from this, whole milk powder is widely utilized as a source of non-fat milk solids in baked and confectionery goods. This, along with the growing popularity of milk powder in regions with low availability of milk

and the introduction of organic and lactose-free variants, is strengthening the market growth. Besides this, manufacturers are offering vitamin-fortified whole milk powder for direct use in milk beverages, yogurt, coffee, and tea whitener. Furthermore, the easy availability of different product flavors in instant, organic, and low-fat variants through e-commerce channels is impelling the market growth.
