Abstracts

The global window shutters market size reached US\$ 3.6 Billion in 2023. Looking forward, IMARC Group expects the market to reach US\$ 5.7 Billion by 2032, exhibiting a growth rate (CAGR) of 5.2% during 2024-2032.

Window shutter refers to a movable cover or screen for a window that consists of vertical stile and horizontal rail. It helps in regulating sunlight entry, providing privacy and protection against weather or unwanted intrusion, and enhancing the aesthetics of a building. Owing to this, window shutters are widely installed in residential spaces, office buildings, and other commercial hubs.

In recent years, increasing urbanization owing to the growing number of housing projects is one of the major factors driving the global window shutters market. Moreover, rapid westernization across developing countries, such as India and China, coupled with the expanding base of the affluent middle-class homeowners, has also increased the demand for window shutters. Furthermore, the rising consumer investments on building aesthetics and decor, along with the introduction of smart and automated window shutters, is further driving the product demand.
