Abstracts

The global wireline services market size reached US\$ 11.6 Billion in 2022. Looking forward, IMARC Group expects the market to reach US\$ 16.8 Billion by 2028, exhibiting a growth rate (CAGR) of 6.12% during 2023-2028.

Wireline services are used for lowering measuring devices or equipment into a well for reservoir evaluation, well intervention, and pipe recovery purposes. They employ cabling technology to obtain valuable and actionable real-time data to maximize the understanding of reservoirs and guide critical decisions. These services assist in identifying downhole issues, detecting bypassed production, and providing accurate assessments to ensure maximum recovery of reserves. Moreover, they help reduce the overall costs by eliminating the need for maintenance and non-operational rig downtime. In recent years, wireline services have gained traction in the oil and gas industry for various activities, including exploration, drilling, stimulation, completion and intervention, due to their cost-effectiveness, high data speed and advanced communication technology.

Wireline Services Market Trends:

Wireline services offer several advantages, such as evaluating rock properties, sample recovery, information gathering for pore size, and pressure gathering for production fluid formation. As a result, the expanding oil and gas sector and the rising exploration, production and completion activities represent the primary factors driving the market growth. Additionally, since the production life of offshore oil and gas reservoirs is higher than onshore oil and gas reservoirs, there has been a significant shift toward offshore exploration and production (E&P) activities. This, in confluence with the implementation of favorable government policies, is propelling the market growth. Besides this, the

growing popularity of electric wireline services for well logging purposes is catalyzing the product demand. Furthermore, with the discovery of oil and gas fields, the key players are heavily investing in offshore assets to enhance the overall productivity, lifecycle of the well, and reservoir performance, which in turn is accelerating the adoption of wireline services. Other factors, including the increasing deepwater and shallow water drilling activities, escalating demand for energy, product innovations, and technological advancements, are also creating a positive market outlook.

Key Market Segmentation:

IMARC Group provides an analysis of the key trends in each sub-segment of the global wireline services market report, along with forecasts at the global, regional and country level from 2023-2028. Our report has categorized the market based on wireline type, service type, hole type and application.

Breakup by Wireline Type:

- Electric Line
- Slickline

Breakup by Service Type:

- Completion
- Intervention
- Logging

Breakup by Hole Type:

- Open Hole
- Cased Hole

Breakup by Application:

- Onshore
- Offshore

Breakup by Region:

- North America
- United States

Canada
Asia-Pacific
China
Japan
India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil

Others
Middle East and Africa

Competitive Landscape:

The competitive landscape of the industry has also been examined along with the profiles of the key players being Archer Limited, Baker Hughes Company, Expro Group, Halliburton Company, NexTier Oilfield Solutions Inc., NOV Inc., OILSERV, Pioneer Energy Services Corp., Schlumberger Limited, SGS SA, Superior Energy Services Inc. and Weatherford International plc.

Key Questions Answered in This Report:

How has the global wireline services market performed so far and how will it perform in the coming years?

What has been the impact of COVID-19 on the global wireline services market?

What are the key regional markets?

What is the breakup of the market based on the wireline type?

What is the breakup of the market based on the service type?

What is the breakup of the market based on the hole type?

What is the breakup of the market based on the application?

What are the various stages in the value chain of the industry?

What are the key driving factors and challenges in the industry?

What is the structure of the global wireline services market and who are the key players?

What is the degree of competition in the industry?
