### About Containerized Data Center

A containerized data center is a portable data center pre-installed inside a shipping container. This data center is a part of the modular data center, where each module is a container; the container can host IT, and power and cooling equipment. This data center is available in 20 ft- and 40 ft-long sizes and is delivered to end-users on demand. A wide range of racks and computing equipment are hosted within a containerized data center facility. The deployment cost of a containerized data center facility is less compared to building and renovating a new traditional data center facility. This data center is easy to relocate from one location to another and can be managed centrally.

Technavio's analysts forecast the global containerized data center market to grow at a CAGR of 20.91% over the period 2015-2019.

### Covered in this Report

The report covers the present scenario and the growth prospects of the global containerized data center market for the period 2015-2019. The following are the major end-users of containerized data center: cloud service providers, large enterprises, government agencies, and telecommunication service providers.

Technavio's report, Global Containerized Data Center Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects in the coming years. The report includes a discussion of the key vendors operating in this market.

### Key Regions

- Americas
- APAC
- EMEA

### Key Vendor

- Cisco Systems
- Dell
- Emerson Network Power
- HP
- Huawei Technologies
- IBM
- Schneider Electric
- SGI

### Other Prominent Vendors
