## **Abstracts**

One of the key growth drivers for the carbon thermoplastic composites market is the expanding aerospace and defence sectors globally. Additionally, the International Civil Aviation Organisation wants to lessen the aviation sector's greenhouse gas emissions, which is boosting the adoption of aircraft emission requirements for new aircraft. As a result, the market growth increases during the research period. Additionally, the expanding aircraft production in various emerging nations like China and India is driving up demand for carbon thermoplastic composites at a notable rate during the assessment period.
