## **Abstracts**

In various application industries, a number of restrictions have been implemented regarding the manufacture of synthetic fibres. Volatile organic compounds (VOCs), which are released by synthetic fibre production facilities, are being limited and reduced by the Environmental Protection Agency (EPA) through the Organic Chemicals, Plastics, and Synthetic Fibres (OCPSF) effluent guidelines and regulations. The synthetic fibres market's largest growth contributor turned out to be the garments application sector. There are numerous uses for garments made from synthetic materials like acrylic, polyester, nylon, rayon, and others. They are soft, sturdy, long-lasting, simple to colour, and a highly absorbent substance.
