## **Abstracts**

Cri-du-chat syndrome obstructs the growth and development and is obvious at birth. Infants with this syndrome often have a feline-like scream, high-pitched, a small head, and distinctive facial features. Common signs are a peculiar cry which sounds as a cat meowing, distinctive facial traits, slow growth, and microcephaly, which is featured by a smaller head size than regular would be distinctive for an infant's age and sex. The global Cri-Du-Chat syndrome treatment market is projected to witness vital growth during the estimated period. Around one in every 50,000 babies is affected from these disorders. The increasing occurrence of Cri-du-chat syndrome-associated disorders is a major aspect likely to fuel the worldwide Cri-du-chat syndrome treatment market. Rising demand for behavioral and developmental therapies is also expected to augment the market growth. New services for physical therapy, such as pre-recorded video material and computer or video calls, the surge in them further fuels the cri-du-chat syndrome treatment market opportunity. On the other hand, the increased cost of the treatment and dearth of awareness among people and pre-linked genetic defects are few factors the market is expected to get restrained in the forecast period. The Cri-du-chat Syndrome Treatment Market is anticipated to grow at a rate of 3.6% CAGR by 2027.

Cri-du-chat Syndrome Treatment Market on the basis of Treatment

Physiotherapy

Speech Therapy

Occupational Therapy

## Cri-du-chat Syndrome Treatment Market on the basis of End User

Hospitals and Specialty Clinics

Others

## Cri-du-chat Syndrome Treatment Market on the basis of Geography

North America

Europe

Asia Pacific

Rest of the World

The cri-du-chat syndrome treatment market based on treatment is divided as Physiotherapy, Speech therapy and Occupational therapy. Among all the treatments the physiotherapy segment has the major share in the market. The major share of the segment is ascribed to the rise in awareness regarding the physiotherapy and its benefits. The physiotherapy can help the child with cri-du-chat syndrome develop strength and progress through their gross motor skill milestones from infancy to childhood – from rolling to walking to running to jumping.

As per the end user, the market is bifurcated into Hospitals and specialty clinics and Others. The hospitals and specialty clinics segment holds the significant share in the cri-du-chat syndrome treatment market growth. This share of the segment is accounted for fact that hospitals offer higher capacity for both outpatients and inpatients. In addition to this, patients trust hospitals and specialty clinics for better treatment than others facilities. On the other hand, the others segment is also likely to grow at a considerable rate.

According to the regional analysis, the market is classified into North America, Europe, Asia Pacific and rest of the world. The North America region accounted for the highest share in the cri-du-chat syndrome treatment market. This is ascribed to the technological advancements in physiotherapy techniques, growth in awareness regarding the physiotherapy treatment for cri-du-chat syndrome, and existence of key and strong hospital infrastructure in the region.

Moreover, the governments across the world are investing in rare condition research and development, including cri-du-chat syndrome. These initiatives are offering funding for research and development, as well as incentives for pharmaceutical companies to

invest in cri-du-chat syndrome treatments. Thus, the growing research efforts are fueling the cri-du-chat syndrome treatment market growth. Apart from this, there is a rising body of research emphasized on understanding the basic mechanisms of cri-du-chat syndrome and developing new treatments and therapies. This research is propelling innovation in the global cri-du-chat syndrome treatment market and is projected to lead to new treatment options in the future.

Hoppers Physio, Movement Masters Physical Therapy, Chatham Speech and Myo, Jeevam Therapy, the Institute for Child Development, Physiocomestoyou, Euro-Therapies, Blossoms Physiotherapy, Pediatric Advanced Therapy, and Rio Children's Hospital are the leading players of the market.

Therefore, the rising incidence of cri-du-chat syndrome is creating a huge demand for the treatment. Moreover, people have become more conscious about the syndrome and parents of children are seeking for the help, where the emerging treatments such as physiotherapy, speech therapy and occupational therapy are playing a vital role.

This research provides the details of prominent shifts in market dynamics and segmentation details of the market.

Past, present and forecasted market analysis is depicted in this report term of qualitative and quantitative.

This research also provides the assessment of market developments and emerging segments and regional markets of the market.

Vital strategies, mergers, company expansions, acquisitions and new product launches of leading vendors are included in this report.

## Contents

### **1. EXECUTIVE SUMMARY**

### **2. INDUSTRY OUTLOOK**

2.1. Industry Overview

2.2. Industry Trends

### **3. MARKET SNAPSHOT**

3.1. Market Definition

3.2. Market Outlook

3.2.1. Porter Five Forces

3.3. Related Markets

### **4. MARKET CHARACTERISTICS**

4.1. Market Overview

4.2. Market Segmentation

4.3. Market Dynamics

4.3.1. Drivers

4.3.2. Restraints

4.3.3. Opportunities

4.4. DRO - Impact Analysis

### **5. TREATMENT: MARKET SIZE & ANALYSIS**
