Abstracts

In order to expand their product lines, major market players are heavily investing in research and development, which will propel the Distributed Generation market's growth. In order to expand their global presence, market players are also implementing a variety of strategic measures, including the introduction of new products, signing contracts, merging with other companies, investing more, and working together. To grow and thrive in a more competitive and developing market, Distributed Generation business rivals need to provide affordable products.

In order to extend their product lines, the key market players are heavily investing in R&D, which will propel Distributed Energy Generation's market expansion. In addition to major industry developments such as new product launches, contracts, mergers and acquisitions, higher investments, and partnerships with other companies, market players are also engaging in a range of strategic initiatives to broaden their reach. In order to survive and prosper in an increasingly competitive market, Distributed Generation business rivals need to provide reasonably priced goods.

One of the primary strategies used by manufacturers in the Distributed Generation sector to assist consumers and increase market share is local manufacturing in order to reduce operating costs. Recently, medicine has benefited greatly from the Distributed Power Generation sector. Major players in the industry, such as Bergey Windpower, General Electric Company, Ansaldo Energia, Bloom Energy, Schneider Electric SE, Caterpillar Inc., Siemens AG, Mitsubishi Heavy Industries Ltd., Fuel Cell Energy Inc.,

Cummins Inc., and others, are funding research and development (R&D) initiatives in an effort to drive up market demand.

Research Methodology:

After secondary research provided a fundamental understanding of the worldwide Distributed Generation Market scenario, extensive primary research was carried out. A number of primary interviews were carried out with industry experts from the supply and demand sides, including C- and D-level executives, product managers, and marketing and sales managers of major manufacturers, distributors, and channel partners from tier 1 and tier 2 companies offering Distributed Generation Market, as well as personnel from academia, research, and CROs. These interviews were conducted across five major regions: North America, Europe, Asia Pacific, and the Rest of the World (Latin America & the Middle East & Africa). Participants from the supply-side and demand-side participated in about 70% and 30% of the primary interviews, respectively. Through the use of questionnaires, emails, online surveys, in-person interviews, and phone interviews, this main data was gathered. The primary participants share is given below:

The segmentation coverage of the study is provided below.

Distributed Generation Market based on Technology:

Solar PV

Wind Turbine

Fuel Cell

Gas Turbine

Others

Distributed Generation Market based on Application:

Industrial

Residential

Commercial

Distributed Generation Market based on Geography:

North America

US

Canada

Europe

Germany

UK

France

Italy

Spain

Rest of Europe (RoE)

Asia Pacific (APAC)

China

Japan

India

Australia

South Korea

Rest of Asia Pacific (RoAPAC)

Latin America (LATAM)

Brazil

Argentina

Rest of South America

Middle East and Africa (MEA)

UAE

Turkey

Saudi Arabia

South Africa

Rest of Middle East & Africa

Based on technology, the Distributed Generation market is segmented into fuel cell, biogas, solar, wind, geothermal, and others. In terms of revenue, the solar category accounted for the majority of the distributed generation market in 2021. Due in large part to the lower setup costs for both residential and commercial use, the solar segment is driving the industry and holds the biggest market share.

On-Grid and Off-Grid are included in the market segmentation of Distributed Generation depending on application. In 2021, the On-Grid category accounted for the majority of revenue generated by the Distributed Generation market. The market in this industry is dominated by the on-grid segment because these solutions are relatively straightforward and affordable.

The Distributed Generation market is segmented into residential, commercial, and industrial end users. During the 2022–2030 projection period, the commercial category is anticipated to increase at a higher rate than it did in 2021, when it dominated the market. This is a result of the increased use of subsidies and other forms of inducement by the government to encourage the use of renewable energy sources in the commercial and industrial sectors. This market has grown as a result of lower

equipment prices and a greater need for a steady supply of electricity. Additionally, the government's enhanced attempts to urbanize and industrialize rural areas are fostering the expansion of the commercial and industrial category, which is why it is anticipated to dominate for the duration of the prediction. These are all favorable factors for distributed generation.

The report offers market information for North America, Europe, Asia-Pacific, and the rest of the world, broken down by region. During the course of the study, the Asia-Pacific Distributed Generation market is anticipated to rise at a notable CAGR. This may be simply attributed to the expanding use of renewable energy sources, growing investments in urbanization and industrialization, the rapid expansion of infrastructure projects, and the growing number of government initiatives supporting the use of green and clean energy sources. Furthermore, as industrialization increases, there is a greater need than ever for a reliable and efficient power source, which is driving the distributed generation market in the Asia Pacific region.

Additionally, the United States, Canada, Germany, France, the United Kingdom, Italy, Spain, China, Japan, India, Australia, South Korea, and Brazil are among the important nations examined in the market analysis.

This report illustrates the most vital attributes of the Distributed Generation Market, which are driving and providing opportunities.

This research gives an in-depth analysis of the Distributed Generation Market growth on the basis of several segments in the market.

This report presents the predictions of the past and present trends of the Distributed Generation Market.

This study also presents the competitive analysis, such as key strategies and capabilities of major players of the Distributed Generation Market.

Contents

1. EXECUTIVE SUMMARY

2. INDUSTRY OUTLOOK

2.1. Industry Overview

2.2. Industry Trends

3. MARKET SNAPSHOT

3.1. Market Definition

3.2. Market Outlook

3.2.1. Porter Five Forces

3.3. Related Markets

4. MARKET CHARACTERISTICS

4.1. Market Overview

4.2. Market Segmentation

4.3. Market Dynamics

4.3.1. Drivers

4.3.2. Restraints

4.3.3. Opportunities

4.4. DRO - Impact Analysis

5. TECHNOLOGY: MARKET SIZE & ANALYSIS

5.1. Overview

5.2. Solar PV

5.3. Wind Turbine

5.4. Fuel Cell

5.5. Gas Turbine

5.6. Others

6. APPLICATION: MARKET SIZE & ANALYSIS

6.1. Overview

6.2. Industrial

- 6.3. Residential
- 6.4. Commercial
- 6.5. Others

7. GEOGRAPHY: MARKET SIZE & ANALYSIS

- 7.1. Overview
- 7.2. North America (U.S., Mexico, Canada)
- 7.3. Europe (France, Germany, UK, Italy, Netherlands, Spain, Russia, Rest of Europe)
- 7.4. Asia Pacific (Japan, China, India, Australia, South East Asia, Rest of APAC)
- 7.5. Latin America (Brazil, Argentina)
- 7.6. Middle East & Africa (Saudi Arabia, UAE, South Africa, Rest of Middle East and Africa)

8. COMPETITIVE LANDSCAPE

- 8.1. Competitor Comparison Analysis
- 8.2. Market Developments
 - 8.2.1. Mergers and Acquisitions, Legal, Awards, Partnerships
 - 8.2.2. Product Launches and execution

9. VENDOR PROFILES

- 9.1. TOYOTA TSUSHO CORPORATION
 - 9.1.1. Overview
 - 9.1.2. Financial Overview
 - 9.1.3. Product Offerings
 - 9.1.4. Developments
