Global eSIM Market – Drivers, Restraints, Opportunities, Trends, and Forecast up to 2025

eSIM (embedded subscriber identity module) is an embedded rewritable chip that eliminates the need for a physical SIM in electronic devices, which requires M2M and telecom communication. eSIM enables remote SIM provisioning for mobile devices and is currently supported by several telecom carriers. Few of the major tech companies, including Apple, Alphabet (Google), Samsung, and Huawei, have released devices that have eSIM capability. Google's Android framework has started providing standard APIs for accessing eSIM and managing subscription profile on the eSIM since Android 9.

eSIM is similar to traditional physical SIM in aspects such as access points and IMEI numbers. However, when an organization hands over an eSIM to an employee, the organization loses control over the data used by the SIM, since the employee can use it across multiple devices. Through an eSIM, the organization can restrict the employee to use a pre-defined device for data consumption and thereby could exert more control over the data consumed.

Another advantage of using eSIM is the ease of changing mobile network operators. This will affect the carriers negatively since more customers will have the tendency to

shift connection if they are not satisfied, provided the mobile number does not change. However, network operators have several advantages of using eSIM, including reduced cost, increasing subscribers, and better security. There has been growth in the number of telecom companies supporting eSIM capabilities with many major companies, including NTT Docomo, AT&T, Etisalat, Vodafone, and Telefonica, providing eSIM solutions.

The global eSIM market is expected to cross \$700 million mark by the end of 2019, with the demand for eSIM increasing in areas including connected cars, consumer electronics, and IoT devices. The report also discusses the eSIM management services, including platform management provided by certain companies.

Based on geography, the global eSIM market is segmented in the regions of North America, Europe, APAC and RoW. RoW includes Middle East, South America, and Africa. North America is the leading revenue generator in the global eSIM market, with a significant share of the market contributed by the US.

Based on end-users, the global eSIM market is segmented into automotive sector, telecom sector, utilities sector, manufacturing sector, logistics sector, and others. Others include the use of eSIM devices for environment safety and security services used across all urban areas including smart cities. Few of the major use cases of eSIM will be witnessed in vehicle telematics apart from the telecom devices. Increasing R&D on connected vehicles and autonomous vehicles will fuel the demand for eSIM during the forecast period.

Based on offering, the global eSIM market is segmented into hardware segment and connectivity management services. The hardware segment includes the revenue generated from the sales of eSIM hardware modules. Connectivity management services involve the services provided by vendors for securely and remotely managing the lifecycle of cellular subscriptions.

Major vendors in the global eSIM market are STMicroelectronics, Sierra Wireless, Oasis Smart SIM, IoTivity Communications, Thales (Gemalto), Emnify, Tata Communications, Infineon Technologies, Giesecke+Devrient Mobile Security, KORE Wireless, and Workz Group.

According to Infoholic Research, the global eSIM market will grow at a CAGR of over 90% during the forecast period 2019–2025. The aim of this report is to define, analyze, and forecast the eSIM market based on segments, which include end-user, offering,

and region. In addition, global eSIM market report helps venture capitalists in understanding the companies better and make well-informed decisions and is primarily designed to provide the company's executives with strategically substantial competitor information, data analysis, and insights about the market, development, and implementation of an effective marketing plan.

The report, global eSIM market, comprises an analysis of vendors, which includes financial status, business units, key business priorities, SWOT, business strategies, and views.

The report covers the competitive landscape, which includes M&A, joint ventures & collaborations, and competitor comparison analysis.

In the vendors profile section, for companies that are privately held, the financial information and revenue of segments will be limited.

Contents

1 EXECUTIVE SUMMARY

2 INDUSTRY OUTLOOK

2.1 Industry Snapshot

2.1.1 Industry Trends

3 MARKET SNAPSHOT

3.1 Total Addressable Market

3.2 Segmented Addressable Market

3.2.1 PEST Analysis

3.2.2 Porter's Five Force Analysis

3.23 Related Markets

4 MARKET CHARACTERISTICS

4.1 Market Ecosystem

4.2 Market Segmentation

4.3 Market Dynamics

4.3.1 Market Drivers

4.3.2 Market Restraints

4.3.3 Market Opportunities

4.3.4 DRO – Impact Analysis

5 GLOBAL ESIM MARKET, BY END-USER

5.1 Overview

5.2 Automotive Sector

5.3 Telecom Sector

5.4 Utilities Sector

5.5 Manufacturing Sector

5.6 Logistics

5.7 Others

6 GLOBAL ESIM MARKET, BY OFFERING

- 6.1 Overview
- 6.2 Hardware
- 6.3 Connectivity Management

7 GLOBAL ESIM MARKET, BY REGION

- 7.1 Overview
- 7.2 North America
 - 7.2.1 US
 - 7.2.2 Canada
- 7.4 Europe
 - 7.4.1 UK
 - 7.4.2 Germany
 - 7.4.3 France
 - 7.4.4 Others
- 7.4 APAC
 - 7.4.1 China
 - 7.4.2 Japan
 - 7.4.4 Others
- 7.5 RoW

8 COMPETITIVE LANDSCAPE

- 8.1 Competitor Analysis
- 8.2 Product/Offerings
- 8.3 Market Developments
 - 8.3.1 Mergers & Acquisitions (M&A)
 - 8.3.2 Expansions
 - 8.3.3 Business Restructuring

9 VENDORS PROFILE

- 9.1 STMicroelectronics
 - 9.1.1 Analyst Opinion
 - 9.1.2 Business Analysis
- 9.2 Sierra Wireless
 - 9.2.1 Analyst Opinion
 - 9.2.2 Business Analysis
- 9.3 Oasis Smart SIM

- 9.3.1 Analyst Opinion
- 9.3.2 Business Analysis
- 9.4 IoTivity Communications
 - 9.4.1 Analyst Opinion
 - 9.4.2 Business Analysis
- 9.5 Thales
 - 9.5.1 Analyst Opinion
 - 9.5.2 Business Analysis
- 9.6 Emnify
 - 9.6.1 Analyst Opinion
 - 9.6.2 Business Analysis
- 9.7 Tata Communications
 - 9.7.1 Analyst Opinion
 - 9.7.2 Business Analysis
- 9.8 Infineon Technologies
 - 9.8.1 Analyst Opinion
 - 9.8.2 Business Analysis
- 9.9 Giesecke+Devrient Mobile Security
 - 9.9.1 Analyst Opinion
 - 9.9.2 Business Analysis
- 9.10 KORE Wireless
 - 9.10.1 Analyst Opinion
 - 9.10.2 Business Analysis
- 9.11 Workz Group
 - 9.11.1 Analyst Opinion
 - 9.11.2 Business Analysis

10 ANNEXURE

- 10.1 Report Scope
- 10.2 Market Definition
- 10.3 Research Methodology
 - 10.3.1 Data Collation & In-house Estimation
 - 10.3.2 Market Triangulation
 - 10.3.3 Forecasting
- 10.4 Study Declaration
- 10.5 Report Assumptions
- 10.6 Stakeholders
- 10.7 Abbreviations

COMPANIES MENTIONED

Apple, Alphabet (Google), Samsung, and Huawei

I would like to order

Product name: eSIM Market By End-user (Automotive Sector, Telecom Sector, Utilities Sector, Manufacturing Sector, Logistics, and Others), By Offering (Hardware and Connectivity Management), By Geography (North America, Europe, APAC, RoW) – Global Forecast up to 2025

Product link: <https://marketpublishers.com/r/EE18310E1050EN.html>

Price: US\$ 4,000.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/EE18310E1050EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:
