### Key Market Insights

Changing consumer preferences for better nutritional feed products are increasing the demand for feed additives. Further, the focus has shifted toward feed additive inclusive products to tackle the concern of nutritional loss such as unabsorbed fat and protein. The demand from consumers of ruminants and poultry industries is driving the feed additives market. Asia Pacific is currently the leading market for overall feed additives, whereas Europe is gaining popularity in terms of other feed additive chemicals such as amino acids, antibiotics, and feed enzymes. The rising consumer per capita income along with a shift in consumer food behavior toward a protein-rich diet is strengthening

the industry growth in Asia Pacific.

Globally, Asia Pacific is the largest feed additives market, primarily due to the presence of export-oriented manufacturing capacities and intense domestic demand from various end-user industries. The increase in animal farmers is further driving the market growth in the region. The anticipated economic stability in Europe is expected to boost its manufacturing sector, complementing the growth of the feed additives market. North America is likely to remain the key region with a significant contribution from the US. Few of the prominent companies operating in the feed additives market are BASF SE, Cargill Inc., DowDuPont Inc., Novozymes, and Novus International Inc.
