Abstracts

Food sterilization equipment helps in eliminate, kill or deactivate all types of life and other biotic agents from the food products. Food sterilization equipment also helps to fight fungus and various microbes in spices and herbs. Food sterilization equipment is utilized to treat all types of food products such as milk and milk products, beverages, fish, meat, and more specifically for perishable products. Increasing consumer awareness and concerns about foodborne illnesses have led to a greater focus on food safety and quality. Food sterilization equipment helps in eliminating harmful pathogens and spoilage microorganisms, ensuring safer and longer shelf-life food products. Moreover, the rising demand for non-thermal procedure in sterilization in the food and drinks manufacturing is also projected to propel the Food sterilization equipment market significantly. However, the negative perception of consumers is limiting the growth of the food sterilization equipment market. The Food Sterilization Equipment Market is expected to grow at the rate of 6.3% CAGR by 2026.

Food Sterilization Equipment Market by Application

Spices, seasonings, and herbs

Cereals & pulses

Meat, poultry & seafood

Dairy products

Fruits & vegetables

Dried fruits & nuts

Beverages

Others

Food Sterilization Equipment Market by Technology

Heat

Steam

Radiation

Chemical

Filtration

Others

Food Sterilization Equipment Market by Process

Batch sterilization

Continuous sterilization

Food Sterilization Equipment Market by Geography

North America

Europe

Asia Pacific

Rest of the World

As observed in the market segmentation by application, the spices, seasonings and herbs segment is expected to hold the major share in the food sterilization equipment market. Since, the demand is high for the spices and herbs due to the content of antioxidants in spices and herbs which help in consumer health. Due to the benefits of spices and herbs the food producers use them as a main ingredient in the food products, as to provide high quality food products the food producers are focusing on sterilization in the process of manufacturing products which results in high demand for food sterilization equipment in this segment.

In terms of technology, the steam sterilization is the most common type of technology used in sterilization process due to the high-quality safe food products which it produces at less cost. It also extends the shelf life of food products along with improving their nutritional quality.

In the process segmentation, the market is bifurcated into batch sterilization and continuous sterilization and the batch sterilization is the most preferable process in the food sterilization. Since, this process offers better product, container and process scalability and also provides less equipment cost and low possibility of contamination. Moreover, it is much suitable for less acid food such as fruits and vegetables as it does not affect the food.

Further in the market based on geography, the North America is likely to hold the major share in the market and the reasons attributed to the major share are increasing population along with the increasing disposable income in the North America are the two major aspects.

Furthermore, non-thermal sterilization technologies, such as high-pressure processing (HPP), pulsed electric field (PEF), and irradiation, were gaining traction in the global

food industry. These methods offer advantages over traditional thermal sterilization methods by preserving the sensory and nutritional properties of food products while effectively eliminating pathogens and spoilage microorganisms which further fuels the global market growth.

This report provides with the few notable vendors of the food sterilization equipment market such as Buhler, Cosmed Group, De Lama, Ventilex Surgery S.L., Allpax, JBT Corporation, Surdry, Raphanel, Steriflow, Hisaka, Systec, Sun Sterifaab Pvt. Ltd. and International Sonomechanics.

Therefore, the increasing awareness among the public about the food safety as to reduce the risk of getting ill due to unhygienic food the most of the people preferring for sterilized food which is forcing the manufacturing companies to adopt the food sterilization equipment in the manufacturing process.

This report gives the overall analysis of the market growth of Food Sterilization Equipment Market by its sub segments.

This report presents the profiles of the important vendors and analysis of their growth strategies such as mergers, acquisitions and partnerships.

This research elucidates the quantitative and qualitative analysis of Food Sterilization Equipment sub-market, on the bases of major regions.

This report further analyzes the Food Sterilization Equipment market by growth and restraining factors also opportunities and challenges.

Contents

1. EXECUTIVE SUMMARY

2. INDUSTRY OUTLOOK

2.1. Industry Overview

2.2. Industry Trends

3. MARKET SNAPSHOT

3.1. Market Definition

3.2. Market Outlook

3.2.1. PEST Analysis

3.2.2. Porter Five Forces

3.3. Related Markets

4. MARKET CHARACTERISTICS

4.1. Market Evolution

4.2. Market Trends and Impact

4.3. Advantages/Disadvantages of Market

4.4. Regulatory Impact

4.5. Market Offerings

4.6. Market Segmentation

4.7. Market Dynamics

4.7.1. Drivers

4.7.2. Restraints

4.7.3. Opportunities
