Abstracts

Lithium-ion battery adoption for electric vehicles is rising. Lithium-ion battery adoption is accelerating, which is causing an increase in the use of electric vehicles as a result of several causes like energy efficiency, pollution reduction, and customer uptake. Other reasons influencing the adoption of electric vehicles include the development of cutting-edge battery technology and the low maintenance needs for these lithium-ion batteries. As a result of the increased use of lithium-ion batteries, it is projected that the market for recycling them would keep growing.
