Global Medical Imaging Market – Drivers, Opportunities, Trends, and Forecasts:
2018–2024

OVERVIEW

Medical Imaging refers to visualizing of human body parts, organs or tissues, which are used for clinical diagnosis and monitor for treatment of various medical conditions. Every technology used as imaging gives a different type of information about the area being diagnosed or examined. Imaging techniques helps radiologist and physicians to offer accurate diagnosis and right treatment that encompass the fields of radiology, optical imaging, nuclear medicine, and interventions. Modern medical imaging is also used in nuclear medicine and using a variety of methods in visualizing the biological processes occurring in cells of organisms. In this, radioactive markers are used for molecular imaging called the radiopharmaceutical.

X-ray based are the primary or the basic methods of medical imaging. It includes three major types: conventional X-ray, computed tomography (CT) and mammography. Contrast agents are used to enhance the X-ray image that are used for angiography examinations.

Imaging systems today have extensive applications in many fields and in medical the use of X-ray medical diagnostic (computer tomography or digital radiography). The design and features of current imaging systems give an optimal use of information contained in X-ray quanta, which have passed through the patients.

MARKET SCENARIO

The market has witnessed substantial growth in the past few years due to increase in

the acceptance of hybrid technology, multi-modality systems, increase adoption of lower doses of ionizing radiation, increase in demand for healthcare service, active or favorable support by the government, and rise in the prevalence of chronic diseases. Diagnostic imaging is one of the major industries in healthcare, which has adapted to constant changes and continuing to grow consistently. Imaging systems today have extensive applications in many fields and in medical the use of X-ray medical diagnostic (computer tomography or digital radiography). The design and features of current imaging systems give an optimal use of information contained in X-ray quanta, which have passed through the patients. There are numerous technologies being driven and it's hard to provide accurate diagnostic images at lower cost. Therefore, the use of advanced medical imaging systems enables effective and efficient diagnosis.

Most of the leading medical imaging companies focus in developing high quality imaging data for delivering real-time images of that provide assessment of various tissue pathophysiology based on different spectral characteristic of tissue.

Factors such as aging, progressive health condition, hypertension, alcohol consumption, secondary medical conditions such as diabetes depression, cardiovascular, and another serious medical condition. The sales of medical imaging are expected to increase through advancement and technological adoption of multi-modality imaging systems in hospitals.

KEY PLAYERS:

The market is dominated by Siemens Healthcare, GE Healthcare, Philips Healthcare, Toshiba Medical Systems, Hitachi Medical, and Fujifilm Holdings Corp have the maximum revenue generation in the global medical imaging market.

Market Analysis: The Global Medical Imaging Market is estimated to witness a CAGR of 5.8% during the forecast period 2018–2024. The market is analyzed based on five segments, namely product types, portability, type, end-users, and regions.

Regional Analysis: The regions covered in the report are North America, Europe, Asia Pacific, and Rest of the World (ROW). In North America, the US and Canada are set to be the leading countries owing to the highest number of diagnostic cases in 2017. This region dominates the overall presence of medical imaging and has the most diversified X-ray systems available in the market. It has the highest percentage of elderly population with many individuals with chronic diseases such as CVD, diabetes, obesity,

high blood pressure, and other urology related factors. This has attracted most of the customers to sustain and grow over the period and maintain their product presence in the market.

Europe is set to be the second leading region and held more than 25% of the market share in 2017. The market in Europe was largely driven by advances in medical imaging technologies. Factors such as increase in the prevalence of diseases, continuous adaption of advanced technologies, and increase in aging population is driving the market. The countries such as Germany, France, UK, and Italy are the major contributor to the market.

The APAC region is the fastest growing region in the global medical imaging market in 2017.

Competitive Analysis: The global medical imaging market has immense growth opportunities in both developed and developing regions. The market in the developed countries is witnessing an increased adoption of medical imaging systems for high quality imaging, screening and diagnosing due to improved access and encouragement from the government & other healthcare institutions, especially in the US, Canada, France, Germany, and the UK.

The advances in technology and product upgradation will increase the competition among vendors. The market is highly dynamic with the presence of few big players accounting for more than 65% share in the overall market. Siemens Healthcare, GE Healthcare, Philips Healthcare, Toshiba Medical Systems, Hitachi Medical, and Fujifilm Holdings Corp dominated the global Siemens Healthcare, GE Healthcare, Philips Healthcare, Toshiba Medical Systems, Hitachi Medical, and Fujifilm Holdings Corp market in 2017. Other companies like Canon Medical Systems Corporation, Carestream Health, Shimadzu Medical, Hologic, and Esoate SpA have negligible share and compete strongly with the leading vendors in the market. The benefits such as safety, high quality images, easy monitoring and analysis of 3D images, obtain high resolution images to show small breast cancers, and combination with multi-imaging systems have increased the demand of medical imaging in the market.

KEY COMPETITIVE FACTS:

The market is highly competitive with all the players competing to gain market shares. Intense competition, rapid advancements in technology, frequent changes in government policies, and the prices are key factors that confront the

market.

The requirement of high initial investment, implementation, and maintenance cost in the market are also limiting the entry of new players

Benefits: The report provides complete details about the usage and adoption rate of medical imaging market. Thus, the key stakeholders can know about the major trends, drivers, investments, vertical player's initiatives, and government initiatives toward the urology segment in the upcoming years along with details of the pureplay companies entering the market. Moreover, the report provides details about the major challenges that are going to impact the market growth. Additionally, the report gives complete details about the key business opportunities to key stakeholders in order to expand their business and capture the revenue in specific verticals, and to analyze before investing or expanding the business in this market.

Contents

1 INDUSTRY OUTLOOK

- 1.1 Medical Devices Industry
 - 1.1.1 Medical Imaging
- 1.2 Definition: Medical Imaging
- 1.3 Why Medical Imaging?
- 1.4 Evolution of X-ray technology
- 1.5 Industry Trends
- 1.6 Healthcare Spending in the US
- 1.7 Reimbursement Scenario
- 1.8 Regulatory Bodies & Standards
- 1.9 Emerging Global Markets
- 1.10 Patient demographics
- 1.11 PESTLE Analysis

2 REPORT OUTLINE

- 2.1 Report Scope
- 2.2 Report Summary
- 2.3 Research Methodology
- 2.4 Report Assumptions

3 MARKET SNAPSHOT

- 3.1 Total Addressable Market (TAM)
- 3.2 Segmented Addressable Market (SAM)
- 3.3 Opportunity analysis
- 3.4 Reformation in radiology
- 3.5 Related Markets
 - 3.5.1 Ultrasound Devices
 - 3.5.2 Medical X-ray Equipment
 - 3.5.3 MRI Equipment
 - 3.5.4 Mammography Devices
 - 3.5.5 Medical imaging
- 3.6 Porter 5 (Five) Forces

4 MARKET CHARACTERISTICS

4.1 Market Segmentation

4.2 Market Dynamics

4.2.1 Drivers

4.2.1.1 Increase in adoption of imaging systems

4.2.1.2 Rise in number of diagnostic centers

4.2.1.3 Increased government initiatives

4.2.1.4 Rise in demand of multi-modal imaging

4.2.1.5 Widespread applications of medical imaging

4.2.2 Restraints

4.2.2.1 High cost

4.2.2.2 Unfavorable reimbursement plans

4.2.2.1 Intense competition among vendors

4.2.2.2 Paucity of skilled healthcare professionals

4.2.3 Opportunities

4.2.3.1 Advancement in medical imaging

4.2.3.2 Integration of hybrid medical imaging systems

4.2.3.3 Early prevention and diagnosis

4.2.3.4 Rise in demand of portable and wireless medical imaging

4.2.4 DRO – Impact Analysis

4.2.5 Key Stakeholders

5 TRENDS, ROADMAP AND PROJECTS

5.1 Market Trends & Impact

6 BUYING CRITERIA

7 END-USERS

7.1 Hospitals

7.2 Ambulatory Care

7.3 Diagnostic centers

7.4 Others (research centers, non-profit organizations, and nursing home)

8 REGIONS

8.1.1.1 Overview

8.1.2 North America

- 8.1.2.1 Market Overview:
- 8.1.3 Europe
 - 8.1.3.1 Market Overview:
- 8.1.4 APAC
 - 8.1.4.1 Market Overview:
- 8.1.5 Rest of the World
 - 8.1.5.1 Market Overview:

9 MARKET ATTRACTIVENESS

- 9.1 Market Attractiveness by Types
- 9.2 Market Attractiveness by End Users

10 COMPETITIVE LANDSCAPE

- 10.1 Competitor Comparison Analysis

11 VENDOR PROFILES

- 11.1 GE Healthcare
 - 11.1.1.1 Overview
 - 11.1.1.2 Business unit
- 11.1.2 Geographic Presence
- 11.1.3 Business Focus
- 11.1.4 SWOT Analysis
- 11.1.5 Business Strategies
- 11.2 Philips Healthcare
 - 11.2.1.1 Overview
- 11.2.2 Business Focus
- 11.2.3 SWOT Analysis
- 11.2.4 Business Strategies
- 11.3 Fujifilm Holdings Corp
 - 11.3.1.1 Overview
- 11.3.2 Business Unit
- 11.3.3 Geographic Presence
- 11.3.4 Business Focus
- 11.3.5 SWOT Analysis
- 11.3.6 Business Strategy
- 11.4 Siemens Healthcare

- 11.4.1.1 Overview
- 11.4.2 Business Unit
- 11.4.3 Geographic Presence
- 11.4.4 Business Focus
- 11.4.5 SWOT Analysis
- 11.4.6 Business Strategy
- 11.5 Toshiba Medical Systems
 - 11.5.1.1 Overview
 - 11.5.2 Technology
 - 11.5.3 Business Focus
 - 11.5.4 SWOT Analysis
 - 11.5.5 Business Strategy
- 11.6 Hitachi Medical
 - 11.6.1.1 Overview
 - 11.6.2 Technology
 - 11.6.3 Business Focus
 - 11.6.4 SWOT Analysis
 - 11.6.5 Business Strategy

12 COMPANIES TO WATCH FOR

- 12.1 Shimadzu Corp
 - 12.1.1 Overview
 - 12.1.2 Shimadzu: Key highlights
 - 12.1.3 Shimadzu: Key news
- 12.2 Thales Group
 - 12.2.1 Overview
 - 12.2.2 Thales Group: Key highlights
- 12.3 Agfa-Gevaert N.V.
 - 12.3.1 Overview
 - 12.3.2 Agfa-Gevaert N.V.: Key highlights
- 12.4 Carestream Health Inc.
 - 12.4.1 Overview
 - 12.4.2 Carestream Health Inc: Key highlights
 - 12.4.3 Carestream Health Inc: Key news
- 12.5 Hologic Corp
 - 12.5.1 Overview
 - 12.5.2 Hologic Corp: Key highlights
 - 12.5.3 Hologic Corp: Key news
