Abstracts

Inspection Machines include manual, mechanical, and computerized systems that are used to check the quality of the products in terms of packages, packaging components to ensure they conform to a specification like a leakage, weight, faults, and dimensions to maintain the consistency in the overall production line. The growing focus to maintain the quality has fuelled the robust growth of the global inspection machines in the market. Another factor attributed to the growth in the competitive landscape is the heavy investment by the players in research and development activities to acquire a competitive edge over their rivals. One of the significant aspects that enhance the growth of the global inspection machines market is the latest technological advancements and integration of technologies such as IoT, machine learning, and artificial intelligence in all types of production and packaging businesses.

Research Methodology:

The inspection machines market has been analyzed by utilizing the optimum combination of secondary sources and in-house methodology, along with an irreplaceable blend of primary insights. The real-time assessment of the market is an

integral part of our market sizing and forecasting methodology. Our industry experts and panel of primary participants have helped in compiling relevant aspects with realistic parametric estimations for a comprehensive study.

The Inspection Machine market is predicted to grow at a CAGR of 5.4% during the forecasting period. The scope of the Inspection Machine Market is defined in the market analysis as follows:

Based on Type

Fully-automated

Semi-automated

Manual

Based on Product

Vision Inspection Systems

Leak Detection Systems

X-ray Inspection Systems

Combination Systems

Checkweighers

Metal Detectors

Software

Based on Packaging

Ampoules & Vials

Syringes

Blisters

Bottles

Others

The significant factors propelling the need for syringe inspection machines are, growing importance to the safety of syringes, rising the focus on cGMP standards compliance, the rising of light transmission technology to inspect particles later in liquids, and camera-based technologies to identify defects of the cosmetic container in syringes. The high chances of polluting and defects in syringe packaging are other important factors keeping up the demand for syringe inspection machines in syringe production lines.

Based on End-User

Pharmaceutical & Biotechnology Companies

Medical Device Manufacturers

Other

The Inspection Machine market includes pharmaceutical & biotechnology companies, medical device manufacturers, and food processing & packaging companies. The pharmaceutical & biotechnology companies segment is the majorly contributing end-users in the inspection machine market. The large share of this segment can majorly be attributed to the strict regulations imposed by the government regarding the quality of a package and the increasing demand to tackle fake pharmaceutical products, retrieving unsafe products, and improve the overall business performance.

Based on Geography:

North America

Europe

Asia Pacific

Rest of the World

Geographically, the inspection machines market has spread its existence in all regions across the world, such as North America, Asia Pacific, Europe, and the Rest of the world. Out of these regions, Asia Pacific is expected to obtain maximum hold among all other regions. The growth of the region is highly attributed to the rising strictness in regulatory mandates to comply with Good Manufacturing Practices (GMP), and rising number of players in pharmaceuticals and biotechnological regions is another factor which is influencing the growth of Asia Pacific regions in the global inspection machines market in the forecast period of 2018 to 2026.

The major drivers of the inspection machine markets are the rising number of inspection checkpoints along with the growing adoption of automatic Inspection machines, technological advancements, rising demand for inline product inspection, growing need to fulfill the GMP requirements, and the rising demand for the combination of innovative technologies. Furthermore, the increasing demand for reused or refurbished machines is expected to make a major hindrance to the Inspection machines market and also affect the new machinery sales Inspection machines.

The report also includes the analysis of major players in the Inspection Machine market. Some of the major players consist of Thermo Fisher Scientific, Mitsubishi Chemical Holdings Corporation, Robert Bosch GmbH, Teledyne Technologies Incorporated, K?rber AG, Omron Corporation, Cognex Corporation, METTLER-TOLEDO, Jackson Vision Private Limited, and Brevetti C.E.A. SPA.

The increasing awareness about the quality of products and growing regulatory pressure for improved quality control in the product packaging are the main reasons for the inspection machine market to grow enormously all over the world. This report will enable the market competitors to understand the overall market analysis based on every segment.

Inclusive analysis on the product portfolio provided by the major vendors in the inspection machines market

Detailed information on the forthcoming trends, research activities, and product promotion in the global inspection machines market

In-depth information on the profit-making developing regions

In-depth analysis of brand-new products, growing regions, and the current improvements in the global inspection machines market

Overall assessment of products, market position, productive strategies and revenue share of the major vendors in the inspection machines market
