## **Abstracts**

Lactose is the main source of energy and sugar molecule which exists in the milk. Lactose contains two types of sugar which are glucose and galactose. Lactose free food products are those products which are particularly prepared with no lactose in it. In lactose free food products the amount of lactose is minimized or eliminated. This is obtained by fragmenting the lactose molecule which exists in the food into glucose and galactose. Increased awareness about lactose intolerance, which affects a significant portion of the global population, has driven the demand for lactose-free products. Consumers with lactose intolerance seek alternative dairy and dairy-based products which do not cause digestive discomfort. Besides that, the limited taste and texture options may limit the lactose-free products market growth. The Lactose-Free Products Market is estimated to grow at the rate of 14.2% CAGR by 2028.

Lactose-Free Products Market by Type

Milk

Plain

Flavored

Yogurt

Set

Other milk types

Drinking/ Ambient

Regular

Other yogurt types

Probiotic

Cheese

## Lactose-Free Products Market by Form

Lactose-free

No added sugar products/ reduced sugar claims

Reduced Lactose Products

## Lactose-Free Products Market by Category

Organic

Inorganic

## Lactose-Free Products Market by Geography

North America

Europe

Asia Pacific

Rest of the World

The lactose-free products market is based on type and in this segmentation the milk segment has accounted for the highest share in the market. This is due to the enriched benefits of the lactose free milk such as rich in calcium, phosphorus, vitamin B12 and vitamin D. In the production process of lactose-free milk lactase is added due to which the lactose free milk tastes sweeter than conventional milk and also helps in breaking the lactose in to two forms of sugar.

As observed in the market based on form, the lactose-free products market is segregated into Lactose-free, No added sugar products/ reduced sugar claims and Reduced Lactose Products. The no added sugar products or reduced sugar claims is expected to have the highest CAGR in the market growth. The highest growth rate is ascribed to increasing conscious towards fitness and concerned about the health issues

such as obesity and diabetes is increasing demand for the sugar free or no added sugar products.

On the bases of category, the market is bifurcated into organic and inorganic. The organic segment is expected to have the maximum share in the market. This is due to the extreme benefits of organic milk products. The organic milk is taken from those cows which are raised without antibiotics added growth hormones since, the antibiotics and added growth hormones are harmful up to a level. Hence, these are the reasons supporting the high growth of this segment.

As per the market based on geography, the Asia Pacific region is expected to be the first largest share in the market. Due to the drastic urbanization, increasing in the preference for the expensive and healthy food and beverages along with increasing per capita income to boost the market growth in this region.

Moreover, the global lactose-free products market has witnessed an expansion in product offerings across various categories. Beyond traditional lactose-free milk and dairy alternatives, there has been a surge in lactose-free versions of yogurt, ice cream, cheese, butter, and other dairy-based products, catering to diverse consumer preferences across the world.

This report gives the important player's profiles of the market- BASF SE, AshlandLLC, Dow Corning Corporation, Wacker Chemie AG, Air Product and Chemicals Inc., Kemira OYJ, HiMedia Laboratories Pvt. Ltd., Ecolab Onc., Evonik Industries Ag and Elementis Plc.

Since, the dairy industry is witnessing an enormous transformation as the consumer tastes are constantly changing. Consumers have perceived that traditional dairy is imperfect for their consumption owing to the more lactose levels in the dairy products, thus opening the way for the future of lactose free dairy products.

Report gives deep-dive insights of the major operative strategies with focus on the R&D strategies, localization strategies, manufacturing capabilities and sales performance of market vendors.

Research provides an outline of the product portfolio, including product launching, development and positioning.

Study offers analysis of the market share and gives the forecast of present and

future lactose free food market.

Report also provides the analysis of the competitive outlook, competitor's market shares, and supply chain structures.
