The market research report identifies SAP, Fujitsu, IBM, Happiest Minds, and Capgemini as the major vendors operating in the global retail analytics market.

Overview of the Global Retail Analytics Market

According to Infoholic Research, the global retail analytics market will grow at a rate of over 18% during the forecast period 2019–2025 and will be valued more than \$9.5 billion by 2025. The market for retail analytics is predominantly driven by the rising adoption of IoT, Wi-Fi, and RFID tags as well as the increasing adoption of advanced technologies such as cloud-based analytics for decision-making. For instance, Sephora, a French beauty product retailers have deployed video analytics technology to monitor customer behavior in real-time. The company is installing AXIS cameras in its stores to count customers and their movement pattern within the space.

According to the retail analytics market analysis, North America accounted for the

largest share of the global retail analytics market in 2018. With the presence of the highest number of technology innovators and increasing adoption of retail analytics by the retail corporations to enhance customer's buying experience, this region is expected to dominate the market during the forecast period. The Asia Pacific region is expected to witness the fastest growth rate due to rising adoption of retail analytics solutions for reforming the retail landscape during the forecast period.

Retail Analytics Market Research Benefits

The report provides an in-depth analysis of the retail analytics market. Retail analytics enable retailers to understand customer demand time through open management of products and resources in real-time. The technology helps in optimizing inventory management and identification of buying pattern. However, the high cost of deployment, as well as the inability of workforce to understand the behavior of customers, will create a challenging environment for the retail analytics market growth.

The growing adoption of new-age technologies such as AI and their integration with various software solutions is rapidly being adopted among brick and mortar retailers for an omnichannel retail approach. This adoption is resulting in enhanced customer retail experience as well as predicting customer demand in real-time. Sephora, a beauty retailer, introduced the omnichannel expansion of its new brick and mortar connected boutique in the US, facilitated with mobile-enabled experiences such as browsing products on retail iPad stations and providing customized digital makeover suggestions over emails to customers.

Retailers across the globe will increasingly adopt retail analytics and shift towards new-age retailing techniques from traditional brick and mortar models. Rapid embracement

of technological advances such as AI, cloud, and others are driving the demand for retail analytics. Additionally, business expansion by retailers is also boosting the adoption of retail analytics solutions.

Currently, several retail analytics players are offering several solutions that are being used across retail players globally. The report discusses the market in terms of deployment, application, business process, organization size, and regions. Further, the report provides details about the major challenges and drivers impacting the market growth.
