Abstracts

The wearable technology is comparatively a new technology and has started witnessing the growth since the last 2–3 years. The wearable electronic devices such as wristbands, eyewears, earwears and footwears provide hands-free operations, real-time data monitoring and network communication. At present, the wearable devices are being used in different industry verticals such as healthcare, BFSI, defence and retail.

According to Infoholic Research, the “Worldwide Wearable Device Security” market will grow at an estimated CAGR of 51.4% during the forecast period 2016–2022. Since wearable technology is being adopted by almost all the industries, the security concerns for this market are high. One of the key concerns of the wearable technology market is the data privacy. Thus, to resolve this problem, a lot of security software providers are entering the market to provide secure solutions to the industry. At present, North America is one of the key wearable device security markets. Some of the players covered in the report are Fitbit, Apple, Google, Garmin, Nike, Microsoft, HP, CrowdOptic, BotFactory, ODG, Biovotion and Innovega. The report provides a comprehensive review of wearable device security types, services, and industry solutions.

The study covers and analyzes the “Worldwide Wearable Device Security” market. Bringing out the complete key insights of the industry, the report aims to provide an opportunity for players to understand the latest trends, current market scenario, government initiative, and technologies related to the market. In addition, helps the venture capitalist in understanding the companies better and take informed decisions.
