Abstracts

The catalogue “Industrial engineering of the Russian Federation: 550 investment projects” is the fourth edition in the series of catalogues “Industrial construction”, which has been published by the Informational agency “INFOLine” since 2003.

The main aim of the research is to demonstrate the real investment projects , carried out by Russian and foreign capital in different industries of Russia, and also to create an effective mechanism of building partnership relations between participants of investment projects and interested organizations and/or natural persons, that can be contractors, suppliers and consumers of goods and services.

Description of the catalogue and projects: the object of gathering and processing the information are the projects, which according to the Federal Service of National Statistics relate to the section of the All-Russian classifier of foreign-economic activity: “Manufacturing activity”. Thus, the latest version of the catalogue includes 550 projects, which characterize industrial engineering in 2006 in the following way:

- by the quantity of projects, food industry has the largest share – 26%, metallurgy – 20%, chemical and pharmaceutical industry – 13%;
- by the quantity of realizable projects the most active regions are North-west and Central, which have 25% and 23%;
- a large quantity of the projects for the moment of actualization are at the stage of preparatory (30%) and survey(24%) works. At a null cycle there are only 9% of the projects, whereas, at the stage of construction and installation works – 13% and 24%;

- it is planned to finish almost 80% of the projects in 2006-2008. The minimal duration of investment cycle in industrial engineering is 1-1,5 years. Thus, the projects, analyzed in the catalogue, are in the active stage of realization;

- the volume of investments of the projects at the stage of realization is distributed more or less evenly. The projects at the cost of 15-30 millions of dollars have 16%, 30-100 millions of dollars – 16%, 100-200 millions of dollars – 15%;

In order to describe the projects it was developed a special mechanism, which allows to present the information to a user in a convenient way: investors, contractors, suppliers of equipment, terms and stages of realization of the projects, investment volume, and location of producible goods. In the catalogue there is a detailed contact information on the participants of a project (an investor, a contractor, a supplier of equipment). Thus, in the catalogue there are more than 750 companies. It is easy to work with the catalogue as there is assorting by investment companies, by regional and industry belonging.

Sources of information:

- data of the companies – participants of the projects (investors, contractors, designers, equipment suppliers);
- information of more than 1000 Russian and foreign mass media (federal and regional press, informational agencies, internet);
- data, provided by administrations of cities and regions of Russia;

For analyzing the projects, it was also used interviewing, questening.

Contents

Introduction

General characteristics of the Russian economic development

The main indices of the Russian economic development

The Russian industry development peculiarities

Development of infrastructural branches

Power industry

Road economy

Oil and gas industry

Development of processing industries

Food industry

Oil-refining and chemical industry

Woodworking, pulp and paper industry

Metallurgy

Engineering and instrument-making industry

Prospects of investment activity

Structure of investment in fixed capital

Regional structure of investment in fixed capital

Factors of increasing investment in fixed capital within processing industries

Aims and objectives of the catalogue

Structure of projects description

Investment projects in food industry

Investment projects in timber industry

Investment projects in oil-refining and chemical industry

Investment projects in construction and finishing materials industry

Investment projects in metallurgy industry

Investment projects in engineering and instrument-making industry

Investment projects in other industries

Conclusion

I would like to order
