KEY FINDINGS

The Asia-Pacific construction composites market was evaluated to be at \$ 1703 million in 2016. Over the forecast years of 2017-2026, the market is poised to rise at 5.89% CAGR, reaching a net worth of around \$ 2993 million.

MARKET INSIGHTS

Due to the increasing demand for pultruded profiles in the Asia-Pacific market and the rising number of civil applications, the overall Asia-Pacific construction composites market is expected to evolve significantly over the projected years. Growing housing industries in India, Japan, and China are resulting in a significant adoption of construction composites to be used in landscape moldings, roofing, decking, timbers panels, railings, etc. The China construction composites market contributed to a major revenue share in 2016. Its 'One Belt, One Road' initiative is providing opportunities for accelerating many transport infrastructure projects in the region; which has indirectly benefited the construction composites market. However, the availability of several low-cost substitutes in the market and certain recyclability issues could restrain the overall growth of the Asia-Pacific construction composites market.

COMPETITIVE INSIGHTS

Several players in the Asia-Pacific construction composite market include Trex Company Inc, Jiangsu Jiuding New Material Co Ltd, CPG International, Strongwell Corporation, Fiberon Llc, Exel Composites, Hughes Brothers Inc, Fibergrate Composite Structures Inc, Bedford Reinforced Plastics, Upm Biocomposites, Diversified Structural

Composites Inc, Timbertech Limited and Advanced Environmental Recycling Technologies Inc (Aert).
