KEY FINDINGS

The Asia-Pacific dPCR market was valued at \$72 million in the year 2016. However, the market is expected to exhibit the fastest growth over the forecast period of 2017-2025 as compared to any other regional markets. The market is predicted to rise with the highest CAGR of 34.70% and generate \$1151 million by the end of 2025.

MARKET INSIGHTS

The expanding healthcare market in Asia-Pacific countries and the steady rise of genome technology in the region are presenting the market with tremendous growth opportunities. The Asia-Pacific market can be classified on the basis of products & services (reagents & consumables, instruments, and software & services), end-users (pharmaceuticals & biotechnology, research & academic institution, clinical, research organization, forensic laboratories) and application (research, clinical and forensics). However, the market might face some restraints due to the high device costs associated with dPCR and the need for training and up gradation of laboratories workers.

COMPETITIVE INSIGHTS

Some of the major players in the market are: Biomerieux S.A., Qiagen N.V, Nanobiosys Inc, Thermo Fisher Scientific Inc and others.
