#### **KEY FINDINGS**

The Asia-Pacific in-vitro fertilization (IVF) market is forecasted to rise with 12.50% CAGR over the estimated period of 2017-2026. The market is expected to hold much promise for the overall global IVF market, increasing its revenue from \$3124 million to \$10000 million over the said period.

## MARKET INSIGHTS

The cost of IVF procedures is quite cheap in Asia-Pacific as compared to other regional markets. Hence the region is also being preferred by people all over the world for IVF treatments. Perhaps this is the reason that the Asia-Pacific IVF market is slated to showcase the highest CAGR increase for the forecast period as compared to other regional markets. Investments from private equity investors for further advancement in research and development in IVF techniques in this area are providing substantial growth opportunities for the market to grow. However, in some of these Asia-Pacific countries, male infertility is considered as a social taboo which refrains them from using the IVF methods. Instead, they prefer to go for traditional treatments to solve this problem. These factors could possibly restrict the growth of the Asia-Pacific market in the coming years.

#### COMPETITIVE INSIGHTS
